About Release Notes

Apttus Release Notes contain the following information about this release:

- [Packages](#) that are required to upgrade to this release
- [Resolved Issues](#)
- [Known Issues](#)

This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following packages and dependent packages are required to upgrade to this release. These are the *minimum* required versions; later versions are also supported. The packages marked as **(New)** are new packages for this release and must be installed to upgrade to this version .

Product	Latest Certified Version
Apttus Approvals Management (Required if you are using Approvals)	8.0.0395 (8.395)
Apttus Configuration & Pricing (New)	February 2017 Patch 5 (10.1215.39)

Apttus Promotion Management (Required if you are using Promotions)	1.0.0000 (1.0)
Apttus Proposal Management (Required if you are using Proposal Management)	8.2.0144 (8.144)

Product	Latest Certified Version
Apttus Quote/Proposal Approvals Management	6.5.0003 (6.3)
Apttus Quote/Proposal-Asset Integration	6.5.0014 (6.14)
Apttus Quote/Proposal-Contract Integration	8.0.0044 (8.44)
Apttus Quote/Proposal-Configuration Integration (Required if you are using CPQ and Proposal Management)	9.7.0217 (9.217)

Resolved Issues

The following table represents resolved issues on release dated: June 15, 2017.

Case Number	Description	Apttus Internal ID
CPQ 10.1215.39		
	<p>For swap action on the Installed Products page, the correct difference in the Net Price was not calculated for the option product with attributes.</p> <p>This issue is now resolved. With swap action, correct pricing is calculated for option product with the change in attributes.</p> <p>Note that Has Attribute = TRUE is mandatory for the bundle also, otherwise the price may change.</p>	ASSETS-1556

Known Issues

The following table represents known issues on release dated: June 15, 2017.

Apttus Internal ID	Description
ASSETS-784 / ASSETS-772	When you Change or Renew a bundle product, the options are not shown under the correct option group. This behavior is observed when option groups are shared across multiple option groups.
ASSETS-938	The Delta Price and Quantity for an amended asset is incorrect. Delta Price and Delta Quantity is not supported in the previous and current release.
ASSETS-1016	When performing a Swap operation on assets with one-time charge type, the Start Date of the upgraded asset is taken from the Proposal Start Date rather than the Swap Effective Date . To avoid this, you can choose to keep the Start and End Dates on the proposal <i>blank</i> and then swap the assets.
ASSETS-1080	When you click Change for an asset on the Installed Product page and remove an option, the net price of an asset is doubled and the Delta Price is positive.
ASSETS-1165	When a renewal opportunity is created with a one-time charge as the primary line, End Date and Valid Until date does not change.
ASSETS-1173	Cancelling Ramp lines and accepting Order displays positive delta pricing; whereas it should be negative.
ASSETS-1217	Deselection of an option with a roll up (no bundle level Price List Item for the corresponding charge type) does not cancel the underlying roll up asset.

Release Notes

Apttus Internal ID	Description
ASSETS-1226	The warning message <i>Carousel Default Icon"!Error: No content domain found. Cannot display icon images</i> hinders the completion of Terminate and Renew actions. You must provide a value for the Carousel Default Icon (Config Settings > Catalog Page Settings) for most ABO actions to work.
ASSETS-1276	Ramp Renew single line fetches the default attribute values along with other stored values on re-configuring renewal quote.
ASSETS-1283	Cancelled recurring lines show both net price and delta price as negative.
ASSETS-1298	Cancellation of the asset does not update the pre-generated renewal quote or cart associated with the asset. Swapping of the asset does not update the pre-generated renewal quote or cart associated with the asset
ASSETS-1319	Cancelling an asset with the cancellation date as start date calculates an incorrect net price.
ASSETS-1321	The Default Asset Pricing Indicator is unchecked. When you have assets with attributes and asset pricing with some criteria, the Is Asset Pricing is checked. It should be unchecked.
ASSETS-1323	Ramp cancellation is not working for Option assets. When a user tries to delete one of the ramps on a ramp option (using the trash icon on the ramp pop up), no canceled line is generated and no delta price is computed.
ASSETS-1568	Terminating an asset in the midterm does not calculate the correct Net Unit Price .
CPQ-5840	When you unlock the default quantity for a Product Option, Apttus CPQ continues to use the default quantity value derived from the numeric expression you defined. This, in turn, affects the Product Quantity and the Price.

Apttus Internal ID	Description
CPQ-6562	In the community org for classic UI, the system does not show values for the Search Filters on the catalog page. Under Refine Your Search section, you can see all the search filters without their values to select.
CPQ-6586	<p>When you specify "Date Time" value for the product attribute and click Go To Pricing, the system shows the following error on the Cart page:</p> <p><i>!Unexpected type for Apttus_Config2. RemoteCPQController.performAction(Apttus_Config2.RemoteCPQ.CartRequestDO).</i></p> <p>Note: "Date time" attribute type is not supported in this release.</p>
CPQ-7187	The Constraint Rule triggered while deleting a Line Item displays the validation message twice on the Catalog and Cart pages. This behavior is observed when the validation message is triggered from an <i>addError</i> method in the trigger for Line Item object.
CPQ-7642	In a scenario with a constraint rule of sub-bundle to sub-bundle inclusion with Action Intent = Prompt , the system displays the prompt window multiple times and does not add the sub-bundle product.
CPQ-8674	When you apply adjustments to the Line Items in the Summary section and not click Reprice on the Cart, the system allows you to finalize the Cart without giving any error.
CPQ-9433	If the character limit for the name of the Quote/Proposal document generated using Proposal Document Generation exceeds 80, the system throws an error while merging this document with additional documents.
CPQ-10044	For a sub-bundle product, when Show Tab is set to <i>False</i> and option group has Is Picklist set to <i>True</i> , the Product Options tab displays the product attributes on the configuration page.

Release Notes

Apttus Internal ID	Description
CPQ-10286	If you have added <i>Apttus_Config2__Version__c</i> field in the Config System Properties > Revalidation Product Columns , the system throws a <i>"duplicate error"</i> on the revalidation pop-up on the cart page.
CPQ-10518	While creating a Price Ruleset, Application Method field is enabled by default, irrespective of value in Application Level field.
CPQ-10659	When you upgrade to this release, intermittently you may get the following error message: <i>Field \$Label.Choose does not exist. Check spelling. RemoteCPQ: Field \$Label.Choose does not exist. Check spelling.</i>
CPQ-10670	PAV extension attribute fields which are marked as primary attributes do not get merged from the child to parent cart in the quote collaboration process.
CPQ-11866	The enhanced smart search displays filter values in the slider which are applicable for inactive products also. Ideally, the system must not consider the inactive products.
CPQ-12011	With Related Price Scope set as <i>Cart</i> , for a scenario where the price of bundle A is related to the price of bundle B, when you remove bundle B, the price of bundle A does not revert back to the original price.
