About Release Notes

Apttus Release Notes contain the following information about this release:

- [Packages](#) that are required to upgrade to this release
- [System Requirements and Supported Platforms](#) information about the requirements and recommendations that you must consider before you proceed with the installation
- [Resolved Issues](#)
- [Known Issues](#)

 This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following packages and dependent packages are required to upgrade to this release. These are the *minimum* required versions; later versions are also supported. The packages marked as **(New)** are new packages for this release and must be installed to upgrade to this version.

Product	Latest Certified Version
Apttus Approvals Management (Required if you are using Approvals)	8.0.0409 (8.409)

Apttus Quote/Proposal-Asset Integration	6.5.0014 (6.14)
Apttus Quote/Proposal-Contract Integration	8.1.0048 (8.48)
Apttus Quote/Proposal-Configuration Integration (Required if you are using CPQ and Proposal Management)	10.2.0263 (10.263)

System Requirements and Supported Platforms

The following table lists the minimum requirements for installing and using CPQ.

System Requirements	
Item	Requirement
Operating System	Standard Salesforce.com requirements. See Salesforce PDF .
Browser	<p>Apttus supports the following browsers:</p> <ul style="list-style-type: none"> • Microsoft Edge • Mozilla Firefox • Google Chrome <p>Apttus recommends its customers to use “Edge” as the Microsoft browser of choice when using the angular versions of Apttus CPQ.</p> <p>Note: Internet Explorer is not supported.</p>
Microsoft Office	<ul style="list-style-type: none"> • Microsoft Word 2007 with Service Pack 2 plus hotfix package 976477 (Word 2007 version number must be greater than 12.0.6520.4999) • Microsoft Word 2010 (32-bit & 64-bit) <p>Apttus recommends the latest Microsoft Office Suite for the best performance.</p>

Upgrade Notes

After upgrading to this release, it is recommended that you create custom labels for any custom actions; otherwise, buttons will not display on the cart.

For more information on pre and post upgrade, see [Upgrade Information](#) in the admin guide.

Resolved Issues

The following table lists issues that are resolved in this release.

Case Number	Description	Apttus Internal ID
CPQ 10.1403.4		
00214813	<p>On the price list page of CPQ Admin, when you navigated to PLIs of your Price List, Apttus CPQ did not allow you add a PLI twice on the same page, however when you went to a different page then it allowed you to add duplicate records of the same PLI.</p> <p>This issue is now resolved. You cannot add the same product twice although you go to any other page.</p>	CPQ-14530
00218139	<p>When you merged the child cart, which had 30 or more new line items, with its parent cart, the collaboration merge request failed.</p> <p>This issue is now resolved. You can merge 30 new line items seamlessly during quote collaboration.</p>	CPQ-15340

Known Issues

The following table represents known issues on this release.

Apttus Internal ID	Description
ASSETS-1603	When you perform Renew action for a bundle product and deselect an option, incorrect Net Price for option and incorrect rollup price bundle is calculated on the cart.
ASSETS-1636	After you have renewed an asset with a one-time primary line when you perform Change: Config action, an incorrect Delta Price and Net Price is calculated on the cart.
ASSETS-1641	During Terminate action, the system retains originally discounted price for an option product, although the option price got changed on Change action.
ASSETS-1647	Renewal Quote should drop lines post Change: Config instead of updating on existing Renewal quote as "Changed Config" asset is no longer eligible for further Renew.
ASSETS-1711	Change post renewal on option ramp with "renew one line" shows 2 option lines instead of 1 which was originally renewed.
ASSETS-1724	Config asset pricing criteria are not functioning when single ramp renewed line (renew one ramp = true).
ASSETS-1769	Asset Pricing does not work properly for Asset without attributes when asset pricing criteria have some attribute API defined for other assets.
CPQ-7272	You are able to apply same coupon for more than once in order to give incentives.
CPQ-11829	If the option group is single select and requires the selection (min:1, max:1) , then you cannot make it optional from the configuration page but can make it optional from the cart. You can notice the same behavior when option is required by default.
CPQ-12336	Rollup data get auto-generated when incentives are saved for the first time. You can make additional changes directly on the roll-up record. These subsequent changes should not be overwritten when the incentives are saved again.
CPQ-13730	Promotion is getting applied for inactive coupons.
CPQ-14443	If option End Date is less than bundle End Date, on reprice bundle End Date changes and becomes equal to option End Date.
CPQ-15170	When you add ramp with a price escalator, the added price ramp lines take up the base price of previous ramp line rather than latest one.

Apttus Internal ID	Description
CPQ-15298	After you apply a promotion to the product on the cart, the Incentive Code is missing on the cart line item.
CPQ-15364	When you remove multiple records for Related Price Line Item (To) related list on a PLI, the corresponding entries are not removed from Custom Settings > Config Related Pricing Group Fields .
CPQ-15521	When you use the CSR flow with Asset Manager button in an account record to view the Installed Products page, the service catalog is displaying zero products under the Relate tab.
CPQ-18587	For the custom setting Related Price Scope set to Cart, adding a bundle containing two options with related pricing calculates an incorrect price for the related option products. This was observed when you add the same bundle twice to the cart.
CPQ-33607	If you manually select mandatory options after deselecting them, Apttus CPQ displays optional checkbox. Ideally, Apttus CPQ hides optional checkboxes for mandatory options.
CPQ-33710	With Allow Manual Adjustment set to False, Apttus CPQ did not allow you to apply adjustment through "multiple adjustment" pop-up.
CPQ-34041	All the cart columns are not correctly visible on the cart grid when you use Internet Explorer 11. Note that IE 11 is not supported in this release.
CPQ-34290	When you click Multiple Adjustments pop-up, but without doing anything you just close the pop-up, then reprice action becomes active. Now if you click Finalize before clicking Reprice , Apttus CPQ shows a price pending error. Workaround: Click Reprice to get rid of price pending error before clicking Finalize .
CPQ-34356	When you enable the Auto Reprice for the cart comprising standalone as well as bundle product, Apttus CPQ shows incorrect values unless you reprice the cart line items.
CPQ-34372	For Group Adjustment Spread, net price of bundle product with option checkbox is selected, turns to 0 when you apply discount.
CPQ-34374	For Group Adjustment Spread, adjustment is getting removed from the standalone product when repriced.
