About Release Notes

Apttus Release Notes contain following information about this release:

- [Packages](#) that are required to upgrade to this release
- [System Requirements and Supported Platforms](#) information pertaining to the requirements and recommendations that you must consider before you proceed with the installation
- [Resolved Issues](#)
- [Known Issues](#)

 This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following packages and dependent packages are required to upgrade to this release. These are the *minimum* required versions; later versions are also supported. The packages marked as **(New)** are new packages for this release and must be installed to upgrade to this version.

Product	Latest Certified Version
Apttus Approvals Management (Required if you are using Approvals)	8.0.0396 (8.396)
Apttus Configuration & Pricing (New)	10.5.1372.53 (10.1372.53) Winter 2017 Patch 10
Apttus Contract Management	8.9.0392.1 (8.392.1)
Apttus Contract-Configuration Integration (Required if you are using CLM)	10.0.0096 (10.96)
Apttus CPQ API	9.8.0071 (9.71)
Apttus CPQ Admin (Required if you are using CPQ Admin Console)	5.4
Apttus CPQ Approvals Management (Required if you are using Approvals on CPQ objects)	6.5.0067 (6.67)
Apttus Order Management	1.0.0000 (1.0)
Apttus Promotion Management (Required if you are using Promotions)	1.0.0000 (1.0)
Apttus Proposal Management (Required if you are using Proposal Management)	8.3.0164 (8.164)
Apttus Quote/Proposal Approvals Management	6.5.0004 (6.4)
Apttus Quote/Proposal-Asset Integration	6.5.0014 (6.14)
Apttus Quote/Proposal-Contract Integration	8.0.0044 (8.44)
Apttus Quote/Proposal-Configuration Integration (Required if you are using CPQ and Proposal Management)	10.1.0254 (10.254)

System Requirements and Supported Platforms

The following table lists the minimum requirements for installing and using CPQ.

System Requirements	
Item	Requirement
Operating System	Standard Salesforce.com requirements. See Salesforce PDF .
Browser	<p>Apttus supports the following browsers:</p> <ul style="list-style-type: none"> • Microsoft Edge • Mozilla Firefox • Google Chrome <p>Apttus recommends usage of “Edge” as the Microsoft browser of choice when using the angular versions of Apttus CPQ.</p> <p>Note: Internet Explorer is not supported.</p>
Microsoft Office	<ul style="list-style-type: none"> • Microsoft Word 2007 with Service Pack 2 plus hotfix package 976477 (Word 2007 version number has to be greater than 12.0.6520.4999) • Microsoft Word 2010 (32 bit & 64 bit) <p>Apttus recommends usage of the latest Microsoft Office Suite for the best performance.</p>

Upgrade Notes

After upgrading to this release, it is recommended that you create custom labels for any custom actions; otherwise, buttons will not display on the cart.

For more information on pre and post upgrade, see *Upgrade Information* in the admin guide.

Resolved Issues

The following table represents resolved issues in this release.

Case Number	Description	Apttus Internal ID
CPQ 10.1372.53		
DE50699	For the custom cart views Apttus CPQ displayed incorrect ordering of columns. This issue is now resolved. Apttus CPQ displays appropriate ordering for the columns of custom cart views.	CPQ-33096
NA	Apttus CPQ showed distorted rows and extra section at the bottom of Cart Grid UI page when you had large number of line items. This issue is now resolved. Apttus CPQ displays the Cart Grid UI page properly.	CPQ-33559
NA	Apttus CPQ allowed you to add overlapping price ramps without any validation errors, although the PLI was set not to allow any price or date overlaps. This issue is now resolved. Price Ramp overlap settings work correctly without causing any date overlaps.	CPQ-33579
NA	At the sub-bundle level the product default options did not get selected during configuration of the main bundle for the first time. This issue is now resolved. The default options at the sub-bundle level got selected during product configuration.	CPQ-34325
NA	For quantity-based tiered pricing when you priced a bundle product in the cart and applied a manual discount of adjustment type "% Discount off List", the discount did not get applied. However, when the List Price was specified in the PLI the discount got applied. This issue is now resolved. The % Discount off List gets applied on the PLI correctly.	CPQ-34469
NA	When you added more than five favorite configurations which comprised around 10 bundle products, Apttus CPQ slowed down and displayed inaccurate product count in the mini cart. This issue is resolved now. Apttus CPQ displays correct number of line items for the bundle products in the mini cart without any signs of slowness in performance.	CPQ-34492 / CPQ-34557

Known Issues

The following table represents known issues on this release.

Apttus Internal ID	Description
ASSETS-1603	When you perform Renew action for a bundle product and then deselect an option, then Apttus CPQ calculates incorrect Net Price for option and incorrect rollup price bundle on the cart.
ASSETS-1636	After you have renewed an asset with a one-time primary line when you perform Change: Config action, Apttus CPQ calculates incorrect Delta Price and Net Price on the cart.
ASSETS-1641	During Terminate action, Apttus CPQ retains originally discounted price for an option product, although the option price got changed on Change action.
ASSETS-1643	For Change: Configuration action on a standalone product, Apttus CPQ calculates incorrect Net Price for canceled ramp lines on the cart.
ASSETS-1647	Renewal quote drops lines after Change: Config instead of updating on existing Renewal quote because "Changed Config" asset is no longer eligible for further Renew.
ASSETS-1711	Change post renewal on option ramp with "renew one line" shows two option lines instead of one, which is originally renewed.
ASSETS-1724	Config asset pricing criteria is not functioning when single ramp renewed line (renew one ramp is set to true).
ASSETS-1753	Post Change: Config action, the upgraded one-time lines must accept changes made on the cart though "enable one time change" set to false as the upgraded lines are new lines.
ASSETS-1769	Asset Pricing does not work properly for an asset without attributes when asset pricing criteria have some attribute API defined for other assets.
CPQ-12336	Rollup data get auto-generated when incentives are saved for the first time. You can make additional changes directly on the rollup record. These subsequent changes should not be overwritten when the incentives are saved again.
CPQ-14054	Apttus CPQ applies wrong promotion adjustments to the Base Extended and Extended price of the product.
CPQ-15170	When you add ramp with a price escalator, the added price ramp lines take up the base price of previous ramp line rather than latest one.

Apttus Internal ID	Description
CPQ-15298	After you apply a promotion to the product on the cart, the Incentive Code is missing on the cart line item.
CPQ-15353	When you create multiple records for Related Price Line Item (To) related list on a PLI, an error is displayed with zero price on the cart. Also, the corresponding entries are not entered in Custom Settings > Config Related Pricing Group Fields .
CPQ-15364	When you remove multiple records for Related Price Line Item (To) related list on a PLI, the corresponding entries are not removed from Custom Settings > Config Related Pricing Group Fields .
CPQ-15470	If you clone a proposal with large data, then Apttus CPQ throws the following error: <i>Apex heap size too large: 16385451 Error is in expression '{!onLoad}' in page apttus_qpconfig:proposalclone: External entry point</i>
CPQ-15521	When you use the CSR flow with Asset Manager button in an account record to view the Installed Products page, the service catalog is displaying zero products under the Relate tab.
CPQ-18587	For the custom setting Related Price Scope set to Cart, adding a bundle containing two options with related pricing calculates an incorrect price for the related option products. This was observed when you add the same bundle twice to the cart.
CPQ-34583	In case of duplicate entry in Config System Properties > Group by fields, Apttus CPQ shows duplicate products for the cart groups created with those fields.
