September22.09.01 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.09.01 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the *minimum* required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked **(New)** are new for this release.

i You can register your org for the Conga Upgrade Program. Conga Upgrade Program is an automated tool that upgrades packages available in your Salesforce org (Production or Sandbox) to the latest versions. In addition, it also ensures all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Upgrade Program](#).

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Approvals (New) (Required if you are using Approvals)	13.1.344	13.344.31
Conga Base Library (Required if you are using Conga Configuration & Pricing)	3.1.238.8	3.238.8
Conga Billing (Required if you are using Conga Billing)	8.1.299	8.299

Package	Latest Certified Version Name	Latest Certified Version Number
Conga CLM Configuration Integration (Required if you are using CLM)	14.1.0176	14.176
Conga Configuration & Pricing (New)	14.1.2038.79	14.2038.79
Conga Contract Lifecycle Management	13.1.683.1	13.683.1
Conga CPQ Api	14.1.0130	14.130
Conga CPQ Approvals (Required if you are using Approvals on CPQ objects)	12.1.0024	12.24
Conga CPQ Maximizer	8.0.0029	8.29
Conga CPQ Setup (Required if you are using CPQ Admin Console)	14.1.130.1	14.130.1
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0052	8.52
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api	8.1.142	8.142.2
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals	6.5.0005	6.5

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote Asset Integration	6.5.0014	6.14
Conga Quote CLM Integration	11.1.0082	11.82
Conga Quote Configuration Integration (Required if you are using CPQ and Proposal Management)	14.1.0394	14.394
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261	12.261

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

⚠ Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00848740	CPQ-68657	When you enable the "Is Modifiable" checkbox on Field Expression, the checkbox field does not retain its value after collaboration review.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.

Conga Internal ID	Description
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

DOC ID: CPQSEP22PRN20220901

September22.08.11 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.08.11 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

The following feature is new to CPQ in this release.

Introducing a new Admin Setting

APTS_DisableNumberingForCRMessages

In this release, you can control the numbering of constraint rule messages on the CPQ UI. Using this admin setting, you can hide or show the numbering next to the constraint rule messages based on the requirement.

For more information, see [Configuring Admin Settings](#).

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00849513	CPQ-68944	The lookup filter field value is missing after selection on the cart line item and CPQ does not show the correct value n the cart page.
00847355	CPQ-68203	When you upload the documents (from the local system) on the DocGen page, the documents are uploaded as an <i>Attachment</i> and not as a <i>file</i> in the proposal's <i>Notes & Attachment</i> related list.
00848353	CPQ-68137	When you remove a Field Expression using CPQ Admin UI, CPQ does not delete the corresponding field expression record.

Case Number	Conga Internal ID	Description
00846720	CPQ-67903	CPQ creates duplicate product classification records from CPQ Admin UI.
00845026	CPQ-67486	When selecting an attribute with data type as Multi-Select Picklist, you cannot configure Charge Type Criteria through the CPQ Admin UI.
00836386	CPQ-66651	When you have some options that are selected by default, manual adjustment and price override custom field value are not coping to collaboration's configuration for non-primary line items.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-61272	<p>If you keep changing the attribute value multiple times and switching between the Product Attributes tab and the Product Options tab on the Configuration page, the Product Options tab disappears intermittently.</p> <p>Workaround: While changing attributes, you must wait until the constraint rule execution is complete.</p>
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status of Product Configuration is set as New instead of Saved/Finalized.

Conga Internal ID	Description
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September22.06.30 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.06.30 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the *minimum* required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked **(New)** are new for this release.

i You can register your org for the Conga Upgrade Program. Conga Upgrade Program is an automated tool that upgrades packages available in your Salesforce org (Production or Sandbox) to the latest versions. In addition, it also ensures all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Upgrade Program](#).

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Approvals (New) (Required if you are using Approvals)	13.1.344.29	13.344.29
Conga Base Library (Required if you are using Conga Configuration & Pricing)	3.1.238.7	3.238.7
Conga Billing (Required if you are using Conga Billing)	8.1.299.1	8.299.1

Package	Latest Certified Version Name	Latest Certified Version Number
Conga CLM Configuration Integration (Required if you are using CLM)	14.1.0176.6	14.176.6
Conga Configuration & Pricing (New)	14.1.2038.75	14.2038.75
Conga Contract Lifecycle Management (New)	13.1.683.16	13.683.16
Conga CPQ Api	14.1.0130.4	14.130.4
Conga CPQ Approvals (Required if you are using Approvals on CPQ objects)	13.2.25	13.25
Conga CPQ Maximizer	8.0.0029	8.29
Conga CPQ Setup (Required if you are using CPQ Admin Console)	14.1.130.5	14.130.5
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0053	8.53
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api	8.1.142.7	8.142.7
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals	7.0.9	7.9
Conga Quote Asset Integration	6.5.0015	6.15

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote CLM Integration	11.1.0082.3	11.82.3
Conga Quote Configuration Integration (Required if you are using CPQ and Proposal Management)	14.1.0394.6	14.394.6
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261.3	12.261.3

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00842548	CPQ-67078	When you clear and re-enter attribute value matrices (AVMs), nested AVMs do not work as expected.
00846806	CPQ-68207	The RANGE and RANGEI function in field expressions (inside nested IF statements) does not working consistently.
00845343	CPQ-67896	Exclusion rule does not work in nested bundle when the condition has an option from the main bundle.
00848756	CPQ-68416	After you click Merge , the collaboration pop-up stays on the UI for a couple of seconds before it automatically disappears.
00836386	CPQ-66651	CPQ does not copy manual adjustments and price override custom field values to the collaboration's configuration for non-primary line items.
00848010	CPQ-68090	In Turbo mode, if you cancel the collaboration request, the cancellation does not reflect immediately on the line item that the collaboration request is cancelled by the user.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-61272	<p>If you keep changing the attribute value multiple times and switching between the Product Attributes tab and the Product Options tab on the Configuration page, the Product Options tab disappears intermittently.</p> <p>Workaround: While changing attributes, you must wait until the constraint rule execution is complete.</p>
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status of Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	<p>Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org:</p> <p><i>entity is deleted</i></p>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00844489	CPQ-67231	While reconfiguring the finalized configuration, CPQ removes an option that is added by a constraint rule.
00844828	CPQ-67230	When you are switching between radio button items on the Configurator page where an auto-inclusion constraint rule is applied, CPQ does not select common products again.
00843993	CPQ-67080	The CPQWebService.addBundle API for the Based on Price List scenario results in the following error: Attempt to de-reference a null object
00844041	CPQ-67045	When you use the URL to directly configure products and select products quickly, CPQ deselects the products after the processing is complete. This happens when the administrator has selected the Show Checkbox In Rule Dialog setting in Config Select Products Settings.
00837302	CPQ-65445	Related Pricing is not working when you set the Related Adjustment Amount Source and Related Adjustment Applies To fields to Net Price.

Case Number	Conga Internal ID	Description
00839278	CPQ-65052	Even when entry criteria is not fulfilled, CPQ executes price rulesets for options.
00829044	CPQ-64981	If you wait for some time on the Catalog page after selecting a category and then proceed to configure a product on the Cart page, CPQ displays the following error on the cart page: Error - Could not Resolve Remote Action
00820356	CPQ-61248	CPQ does not apply the promotion discount on the line items if the promotion has Rate Type as "Rate Table - No Tiers".

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-61272	If you keep changing the attribute value multiple times and switching between the Product Attributes tab and the Product Options tab on the Configuration page, the Product Options tab disappears intermittently. Workaround: While changing attributes, you must wait until the constraint rule execution is complete.
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status of Product Configuration is set as New instead of Saved/Finalized.

Conga Internal ID	Description
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

⚠ Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table list the issue fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00842044	CPQ-66960	While configuring the product using Advanced Pricing, the value of the sync status field does not change after completing the pricing. The sync status remains as <i>PostPricing Pending</i> instead of <i>Post-Pricing Completed</i> .

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-61272	<p>If you keep changing the attribute value multiple times and switching between the Product Attributes tab and the Product Options tab on the Configuration page, the Product Options tab disappears intermittently.</p> <p>Workaround: While changing attributes, you must wait until the constraint rule execution is complete.</p>
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.

Conga Internal ID	Description
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status of Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (New) (Required if you are using Proposal Management)	12.1.0261.3	12.261.3

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

⚠ Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table list the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00842907	CPQ-66938	While using a formula field in promotion criteria, you are getting Null Pointer Exception. This happens when you have defined a new formula field on the line item.
00830456	CPQ-65326	Wild character asterisk (*) is not working properly with Smart Search.
00839046	CPQ-65232	While sending a proposal through email, CPQ sends the email to the primary contact without it being a recipient. This happens even though you replace the default primary contact with another email ID in the TO field on the Send Email page.
00839600	CPQ-65021	You cannot add an expression greater than 255 characters in the Value Expression and Filter Expression fields.
00840191	CPQ-64945	After you finalize a cart with ramps, while reconfiguring the cart, CPQ does not display the ramp lines in the price ramp pop-up.

Case Number	Conga Internal ID	Description
00838617	CPQ-64778	When you are configuring a product attribute, even though you select the checkbox for the mandatory attribute, the mandatory mark does not go away.
00839579	CPQ-64765	When you cancel an option while renewing the asset, the Net Price and Delta Price calculated on the option returns a negative value.
00836591	CPQ-64406	When you cancel an option while renewing the asset, CPQ updates the bundle line item's start and end date to accommodate the option line item's start date and hence the bundle gets the asset's start and end date.
00835149	CPQ-64344	When you terminate an asset, CPQ does not update fields of datatype Date and Picklist to null value.
00828112	CPQ-64095	While reconfiguring a bundle product that is cloned from another bundle product, if you try to change an option in the bundle, you get the following error: <i>Error executing [updateCartLineItems]: Attempt to de-reference a null object</i>
00832860	CPQ-64013	When you create ramps on a bundle product, you get a wrong selling term on option products. This happens when the Auto Cascade Selling Term is selected on the price list item.
00833227	CPQ-63890	Option search on the bundle configuration page does not work with product translations.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-61272	<p>If you keep changing the attribute value multiple times and switching between the Product Attributes tab and the Product Options tab on the Configuration page, the Product Options tab disappears intermittently.</p> <p>Workaround: While changing attributes, you must wait until the constraint rule execution is complete.</p>
CPQ-59173	<p>In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.</p>
CPQ-58544	<p>You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.</p>
CPQ-55186	<p>Turbo Integrations: After you save or finalize the configuration, the status of Product Configuration is set as New instead of Saved/Finalized.</p>
CPQ-54278	<p>Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org:</p> <p><i>entity is deleted</i></p>
CPQ-54022	<p>Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.</p>
CPQ-49315	<p>Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).</p>

September22.04.21 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.04.21 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the *minimum* required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked **(New)** are new for this release.

i You can register your org for the Conga Upgrade Program. Conga Upgrade Program is an automated tool that upgrades packages available in your Salesforce org (Production or Sandbox) to the latest versions. In addition, it also ensures all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Upgrade Program](#).

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Approvals (Required if you are using Approvals)	13.1.344.19	13.344.19
Conga Base Library (Required if you are using Conga Configuration & Pricing)	3.1.238.7	3.238.7
Conga Billing (Required if you are using Conga Billing)	8.1.299.1	8.299.1

Package	Latest Certified Version Name	Latest Certified Version Number
Conga CLM Configuration Integration (Required if you are using CLM)	14.1.0176.3	14.176.3
Conga Configuration & Pricing (New)	14.1.2038.60	14.2038.60
Conga Contract Lifecycle Management	13.1.683.10	13.683.10
Conga CPQ Api (New)	14.1.0130.3	14.130.3
Conga CPQ Approvals (Required if you are using Approvals on CPQ objects)	13.2.25	13.25
Conga CPQ Maximizer	8.0.0029	8.29
Conga CPQ Setup (Required if you are using CPQ Admin Console)	14.1.130.4	14.130.4
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0052	8.52
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api	8.1.142.7	8.142.7
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals (New)	7.0.9	7.9
Conga Quote Asset Integration	6.5.0015	6.15

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote CLM Integration (New)	11.1.0082.2	11.82.2
Conga Quote Configuration Integration (Required if you are using CPQ and Proposal Management)	14.1.0394.3	14.394.3
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261.2	12.261.2

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table list the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00836757	CPQ-64389	When you create the agreement from a quote using the Create Agreement with Line Items button, CPQ does not create the Automated Activity History record on the agreement.
00832303	CPQ-64985	When you try to export attribute values with special characters to CSV, the export functionality stops working.
00840211	CPQ-64974	In Turbo mode, when you apply a discount to a cart line item and update the cart, CPQ does not change the cart status. Because of this, you cannot submit the quote for approval.
NA	CPQ-64727	In Turbo mode, when you reorder the line item sequence from the User Interface and call <code>Apttus_Config2.CartService.updateLineSequence</code> on the save action, the admin setting does not honor the UI changes and reorders the lines based on the order of insertion.
00826746	CPQ-63199	CPQ cascades a defaulted lookup attribute to an option product even though it is set to null from the Product Attribute Callback Class.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-61272	<p>If you keep changing the attribute value multiple times and switching between the Product Attributes tab and the Product Options tab on the Configuration page, the Product Options tab disappears intermittently.</p> <p>Workaround: While changing attributes, you must wait until the constraint rule execution is complete.</p>
CPQ-59173	<p>In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.</p>
CPQ-58544	<p>You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.</p>
CPQ-55186	<p>Turbo Integrations: After you save or finalize the configuration, the status of Product Configuration is set as New instead of Saved/Finalized.</p>
CPQ-54278	<p>Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org:</p> <p><i>entity is deleted</i></p>
CPQ-54022	<p>Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.</p>
CPQ-49315	<p>Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).</p>

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table list the issue fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00837957	CPQ-64448	You encounter duplicate action buttons on the cart page.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>

Conga Internal ID	Description
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

The following features are new to CPQ in this release.

Introducing a new Admin Entry

APTS_OpenNewTabOnCartAction

When you try to perform any cart actions, a new web browser tab is opened by default to perform them. But, after finalizing the cart, the new tab still stays and creates confusion about whether the cart actions are performed successfully or not. The new admin setting *APTS_OpenNewTabOnCartAction* is introduced to decide where the cart actions are to be performed. For more information, see [Configuring Admin Settings](#).

Introducing a new Admin Entry

APTS_HideCartKebabMenuColumn

In this release, you can control the additional action column (or kebab menu column) visibility on the grid card. Using this admin entry, you can hide or show the additional column based on the requirement. For more information, see [Configuring Admin Settings](#).

Introducing a new Admin Entry

APTS_SkipZeroAdjustmentBenefits

You can now prevent the adjustment lines from generating if the discount value is zero. Hence, you can control the quote or order not to generate the lines with the value zero. For more information, see [Configuring Admin Settings](#).

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description						
00835952	CPQ-64236	When you try reconfiguring the finalized configuration, the option added through the constraint rule gets deleted automatically.						
NA	CPQ-63983	<p>In the split cart, you encounter the remoting exception when the remoting response size is exceeded to 15MB.</p> <p>Resolution: Create a new admin setting as mentioned below.</p> <table border="1"> <tr> <td>Name</td> <td>APTS_GetLineItemChunkSize</td> </tr> <tr> <td>Value</td> <td>50 (minimum)</td> </tr> <tr> <td>Code</td> <td>Leave the field blank.</td> </tr> </table> <div style="border: 1px solid #ccc; padding: 10px; margin-top: 10px;"> <p> • To resolve the error in <i>getCartLineItems</i> & <i>getChildCartLineItems</i>, set APTS_GetLineItemChunkSize = 100 in the admin setting.</p> <p>• To resolve the error in "UpdateCartLineItemsQuietly", set Cart Line Items Update Chunk Size = 5 in ConfigSystemProperty.</p> </div> <p>For more information, see Configuring Admin Settings.</p>	Name	APTS_GetLineItemChunkSize	Value	50 (minimum)	Code	Leave the field blank.
Name	APTS_GetLineItemChunkSize							
Value	50 (minimum)							
Code	Leave the field blank.							
00835366	CPQ-63912	The pricing API (CPQWebService.updatePriceForCart) does not process the line items as per the custom setting batch size.						
00831262	CPQ-63279	The configuration status changes to <i>pending</i> after performing the revalidation on cloned Asset (bundle).						
00825304	CPQ-62439	The <i>Finalize</i> button is not enabled on the cart page when the quote collaboration is cancelled on the saved cart.						

Case Number	Conga Internal ID	Description
00797965	CPQ-60870	When you try to renew an asset with ramp lines, the selling price is calculated as 0 fr wrapper line in the case of the overlapping term.
00837438	CPQ-64474	Applying promotion on the turbo cart is not working as intended.
00830749	CPQ-63677	The CPQ displays the revalidation message on the cart page even if the product version is blank on the product and Line item.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September22.03.10 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.03.10 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the *minimum* required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked **(New)** are new for this release.

i You can register your org for the Conga Upgrade Program. Conga Upgrade Program is an automated tool that upgrades packages available in your Salesforce org (Production or Sandbox) to the latest versions. In addition, it also ensures all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Upgrade Program](#).

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Approvals (Required if you are using Approvals)	13.1.344.13	13.344.13
Conga Base Library (Required if you are using Conga Configuration & Pricing)	3.1.238.7	3.238.7
Conga Billing (Required if you are using Conga Billing)	8.1.299.1	8.299.1

Package	Latest Certified Version Name	Latest Certified Version Number
Conga CLM Configuration Integration (New) (Required if you are using CLM)	14.1.0176.3	14.176.3
Conga Configuration & Pricing (New)	14.1.2038.42	14.2038.42
Conga Contract Lifecycle Management (New)	13.1.683.9	13.683.9
Conga CPQ Api	14.1.0130.1	14.130.1
Conga CPQ Approvals (Required if you are using Approvals on CPQ objects)	13.2.25	13.25
Conga CPQ Maximizer	8.0.0029	8.29
Conga CPQ Setup (New) (Required if you are using CPQ Admin Console)	14.1.130.4	14.130.4
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0052	8.52
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api (New)	8.1.142.7	8.142.7
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals	6.5.0005	6.5

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote Asset Integration (New)	6.5.0015	6.15
Conga Quote CLM Integration	11.1.0082.1	11.82.1
Conga Quote Configuration Integration (New) (Required if you are using CPQ and Proposal Management)	14.1.0394.3	14.394.3
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261.2	12.261.2

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

⚠ Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table list the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00825928	CPQ-63036	On the installed product page, the asset details are not getting populated.
00828435	CPQ-63035	In the lightning mode, when you clone a proposal, CPQ displays an error message.
00828878	CPQ-62738	When you perform Add/Remove at all levels on the bundle (bundle has an auto-included option) and add another asset, CPQ deletes all assets for the auto-included option.
00827208	CPQ-62476	When you execute criteria maintenance job for pricing fields, CPQ displays an error message.
00818488	CPQ-60357	On the cart, when there is a ramp line item, and you add another ramp line, for a brief moment the new ramp line item is created. However, after completion of the pricing, the new line gets deleted and the start and end dates of the primary ramp line item are extended.
00806795	CPQ-58337	On the cart page, when you apply Promotion to one product and execute pricing, CPQ displays an error message indicating to apply pricing for all eligible line items. However, when you apply promotion to the remaining product, the error message is still displayed.

Case Number	Conga Internal ID	Description
00828252	CPQ-62908	Exceeding the text limit on a custom text field on the cart line item, CPQ displays an error message and all the other action buttons become disabled.
00826125	CPQ-62513	In CPQ Admin, when you try to create a formula field to save an expression where the number of characters exceeds 255, the Save button on the formula record becomes inactive.
NA	CPQ-62923	You encounter a <i>line item not found error</i> when you launch the cart in Quick Restore mode.
00825529	CPQ-62138	CPQ does not display the List Price or Base Price for the options on the UI. This issue is observed for the options added through the auto-inclusion rule.
00823922	CPQ-61692	Rearranging line items on a cart using the drag-and-drop feature is not working as intended.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.

Conga Internal ID	Description
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issue fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00827458	CPQ-62684	When you try to configure a bundle product, instead of opening the custom VF page, the cart page directly opens wherein the attributes are not visible, all attributes are available for selection and do not have the correct value preset. This is happening even though the Options Page setting in the Flow Settings is set to OptionAttributeOverride.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.

Conga Internal ID	Description
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no new enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00822981	CPQ-61504	In CPQ Admin, when creating a new rule or opening an associated rule in Manage Product Groups, clicking the Condition/Action criteria does not allow to add the New Filter and an error message is displayed.
00822518	CPQ-61502	When Display Action Callback is used to control the visibility (disable/enable) of a custom button on the Attribute page, the callback is not executed the first time when the product is configured, and the button remains inactive/unavailable. However, If you go to the cart page and come back again to reconfigure the cart, the change is reflected and the required button is then active/available.
00824693	CPQ-62018	On the cart page, when you set a new view as default, CPQ does not automatically switch to the defaulted view. Similarly, when you create a custom view as default in both the Installed Product page and the Cart Page, the default setting of the installed product page is removed.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

Conga CPQ Setup (Required if you are using CPQ Admin Console)	14.1.130.2	14.130.2
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0052	8.52
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api	8.1.142	8.142.4
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals	6.5.0005	6.5
Conga Quote Asset Integration	6.5.0014	6.14

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote CLM Integration (New)	11.1.0082.1	11.82.1
Conga Quote Configuration Integration (Required if you are using CPQ and Proposal Management)	14.1.0394.2	14.394.2
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261.2	12.261.2

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

The following section describes the existing features that are changed (or are no longer supported) in this release.

Display a Spinner on the Service Catalog on Click of the Add to Cart Button

CPQ introduces an admin setting *APTS_EnableBlockingCallsOnServiceCatalog* to display a spinner on the Service Catalog upon the click of the **Add to Cart** or **Update** buttons. When the admin setting is enabled, CPQ displays the spinner to ensure that the creation of related line items is completed for service products (Product Type = Service) before you navigate away to a different page or click another button. Earlier, if you quickly navigated away from the Service Catalog after clicking **Add to Cart**, CPQ did not create related line items for Service products.

For more information, see [Configuring Admin Settings](#).

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00823514	CPQ-61660	When you clone an option, a bundle attribute is not cascading to the option line item.

Case Number	Conga Internal ID	Description
00814267	CPQ-61595	<p>In Service CPQ, while relating a standalone product, if you click Add to Cart and quickly navigate away from the Service Catalog, CPQ does not create related line items for the standalone product.</p> <p>Resolution Info: CPQ introduces an admin setting <i>APTS_EnableBlockingCallsOnServiceCatalog</i> to resolve this issue. When this admin setting is set to true and you click Add to Cart or Update on the Service Catalog, CPQ displays a spinner while the network calls in the background are completed. This prevents you from doing any other action after clicking Add to Cart or Update that can impact the network calls due to which CPQ will not create related line items for standalone service products. For more information, see Enhancements.</p>
00786300	CPQ-54689	When you cancel an asset, CPQ creates an unwanted renewal opportunity.
00785306	CPQ-54456	CPQ displays a validation message even though the validation constraint rule condition criteria is not fulfilled.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.

Conga Internal ID	Description
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September22.12.14 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.12.14 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the *minimum* required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked **(New)** are new for this release.

i You can register your org for the Conga Upgrade Program. Conga Upgrade Program is an automated tool that upgrades packages available in your Salesforce org (Production or Sandbox) to the latest versions. In addition, it also ensures all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Upgrade Program](#).

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Approvals (New) (Required if you are using Approvals)	13.1.344.8	13.344.8
Conga Base Library (New) (Required if you are using Conga Configuration & Pricing)	3.1.238.4	3.238.4
Conga Billing (Required if you are using Conga Billing)	8.1.299.1	8.299.1

Package	Latest Certified Version Name	Latest Certified Version Number
Conga CLM Configuration Integration (New) (Required if you are using CLM)	14.1.0176.2	14.176.2
Conga Configuration & Pricing (New)	14.1.2038.19	14.2038.19
Conga Contract Lifecycle Management (New)	13.1.683.4	13.683.4
Conga CPQ Api	14.1.0130.1	14.130.1
Conga CPQ Approvals (Required if you are using Approvals on CPQ objects)	12.1.0024	12.24
Conga CPQ Maximizer	8.0.0029	8.29
Conga CPQ Setup (Required if you are using CPQ Admin Console)	14.1.130.2	14.130.2
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0052	8.52
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api	8.1.142	8.142.4
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals	6.5.0005	6.5

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote Asset Integration	6.5.0014	6.14
Conga Quote CLM Integration	11.1.0082	11.82
Conga Quote Configuration Integration(New) (Required if you are using CPQ and Proposal Management)	14.1.0394.2	14.394.2
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261.2	12.261.2

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

⚠ Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

The following section describes the existing features that are changed (or are no longer supported) in this release.

Hiding Collaboration Icon Next to Auto-included Products

CPQ now hides the collaboration icon for primary line items that were added to the cart using the inclusion constraint rules. CPQ does not support collaboration on auto-included line items.

For more information, see [Assigning the Configuration to the Collaborator or Queue](#).

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issue fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00808257	CPQ-58336	In Service CPQ flow when you split a service line item, CPQ deletes an option line item from the first bundle.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-59173	In the Unified Cart flow, CPQ displays an error when you add products with multiple charge types and perform the validate action.
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing is not working for Numeric Expression.
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

September22.09.27 Release Notes

In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the CPQ September22.09.27 release. For documentation updates, see [What's New in CPQ Documentation](#).

i This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your Customer Success Manager (CSM) or Account Executive (AE) to discuss your specific features and licensing.

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the *minimum* required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked **(New)** are new for this release.

i You can register your org for the Conga Upgrade Program. Conga Upgrade Program is an automated tool that upgrades packages available in your Salesforce org (Production or Sandbox) to the latest versions. In addition, it also ensures all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Upgrade Program](#).

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Approvals (Required if you are using Approvals)	13.1.344	13.344
Conga Base Library (New) (Required if you are using Conga Configuration & Pricing)	3.1.238.1	3.238.1
Conga Billing (Required if you are using Conga Billing)	8.1.299	8.299

Package	Latest Certified Version Name	Latest Certified Version Number
Conga CLM Configuration Integration (Required if you are using CLM)	14.1.0176	14.176
Conga Configuration & Pricing (New)	14.1.2038.3	14.2038.3
Conga Contract Lifecycle Management (New)	13.1.683.1	13.683.1
Conga CPQ Api	14.1.0130	14.130
Conga CPQ Approvals (Required if you are using Approvals on CPQ objects)	12.1.0024	12.24
Conga CPQ Maximizer	8.0.0029	8.29
Conga CPQ Setup (New) (Required if you are using CPQ Admin Console)	14.1.130.1	14.130.1
Conga Deal Maximizer Setup (Required if you are using Deal Maximizer)	8.0.0052	8.52
Conga Deal Maximizer	7.0.0007	7.7
Conga DocuSign Api	8.1.142	8.142.2
Conga Order Management	1.0.0000	1.0
Conga Promotions (Required if you are using Promotions)	1.0.0000	1.0
Conga Quote Approvals	6.5.0005	6.5
Conga Quote Asset Integration	6.5.0014	6.14

Package	Latest Certified Version Name	Latest Certified Version Number
Conga Quote CLM Integration	11.1.0082	11.82
Conga Quote Configuration Integration (Required if you are using CPQ and Proposal Management)	14.1.0394	14.394
Conga Quote DocuSign Integration	4.1.22	4.22
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	12.1.0261	12.261

 For more information on installing Conga managed packages, refer to [Installing CPQ Packages](#). For more information on upgrading Conga managed packages, refer to [Upgrading CPQ](#).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

There are no enhancements in this release.

Data Model Changes

There are no data model changes in this release.

Fixed Issues

The following table lists the issue fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00780709	CPQ-57942	When you apply a promotion, the Approval Required icon is displayed on the cart line item. But when you remove the promotion due to which the condition to display the icon is not fulfilled now, the Approval Required icon still remains on the Cart.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the status for Product Configuration is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute based pricing is not working for Numeric Expression.

Conga Internal ID	Description
CPQ-49315	Config asset pricing criteria are not functioning on a single ramp renewed line (renew one ramp = true).

System Requirements and Supported Platforms

For information pertaining to the requirements and recommendations you must consider before you proceed with the installation of the Conga product, see [System Requirements and Supported Platforms Matrix](#).

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading CPQ](#).

 Before you upgrade the CPQ packages in your org to September '22 release, please note the following points:

- If the CPQ package in your org is on any of the following releases, you must upgrade it to the Winter '20 patch (Winter20.02.26) before upgrading it to September '22 release:

Release	Package
Spring '20 or earlier release	Packages older than 12.0.1719 12.1719
Summer '20 patch older than Summer20.02.26	Packages older than 12.1.1787.99 12.1787.99
Winter '20 patch older than Winter20.02.26	Packages older than 12.2.1839.48 12.1839.48

- If the CPQ package in your org is on any of the following releases, you can directly upgrade it to September '22 release:

Release	Package
Latest Summer '20 patch (Summer20.02.26 or later)	12.0.1719 12.1719 or later
Latest Winter '20 patch (Winter20.02.26 or later)	12.2.1839.48 12.1839.48 or later
Spring '21 and any Spring '21 patches	13.0.1882 13.1882 or later
Summer '21 and any Summer '21 patches	13.1.1921 13.1921 or later

Release	Package
December '21 and any December '21 patches	13.2.1969 13.1969 or later
May '22 and any May '22 patches	14.0.1995 14.1995 or later
September '22 and any September '22 patches	14.1.2038 14.2038 or later

New Features

The following feature is new to CPQ in this release.

Apply a % Discount on the Base Price

CPQ introduces a new discount type, **% Discount Off Base**, which sales representatives can apply to the base price of standalone and bundle products. CPQ applies this adjustment to the unit price after applying adjustments from price matrices, price rules, and promotions.

For more information, see [Enabling Multiple Adjustments at the Line-Item Level](#) and [Use Case: % Discount and % Discount Off Base](#).

Enhancements

This section describes the existing features that are changed in this release.

Support for Files in Adobe Sign

You can now use documents stored in Files object with Adobe Sign.

Use Attributes from PAV Extension as Price Dimensions

In the CPQ Admin UI, administrators can now use attributes only from the out-of-the-box product attribute value (PAV) extension objects to create price dimensions, which can be

used to create price matrices and price rulesets. CPQ supports different data types (such as text and picklist) for those attributes.

 CPQ does not support custom PAV extension objects for this feature.

For more information, see [Creating Price Matrices](#) and [Creating Price Rulesets](#).

Use Attributes from PAV Extension as Criteria Fields

Criteria fields can now use attributes only from the out-of-the-box product attribute value (PAV) extension objects. CPQ supports different data types (such as text and picklist) for those attributes. In the CPQ Admin UI, administrators can use PAV extension fields to create the following criteria:

- Charge type criteria in price list items
- Ruleset criteria in price rulesets
- Price matrices of type criteria
- Price rules of type criteria
- Asset pricing criteria

 CPQ does not support custom PAV extension objects for this feature.

For more information, see [Creating Price List Items](#), [Creating Price Matrices](#), [Creating Price Rulesets](#), [Creating Price Rules](#), and [Configuring Asset-Based Pricing without Workflow Rules](#).

View Adjustment Lines on the Multiple Adjustments Pop-up, though Multiple Adjustments Are Disabled

CPQ displays adjustment line items on the multiple adjustments pop-up regardless of the value defined in the **Max Adjustment Lines** setting in Config System Properties.

- If the value of this setting is greater than or equal to 1, CPQ displays auto-applied adjustments on the pop-up and allows sales representatives to create as many adjustments as the value defined in this setting. After reaching the limit, CPQ disables the **+ Add another adjustment** button and displays a message.

- If the value of this setting is 0, CPQ displays only auto-applied adjustments on the pop-up and sales representatives cannot add any manual adjustments. CPQ disables the + **Add another adjustment** button and displays a message.

i On the multiple adjustments pop-up, sales representatives can save changes only to manual adjustments. If they modify auto-applied adjustments, CPQ reverts the changes to the original on clicking **Save**.

For more information, see [Config System Properties, Enabling Multiple Adjustments at the Line-Item Level](#), and [Applying Multiple Adjustments on Line Items in the Cart](#).

Search Assets Using Special Characters

You can now search assets on the Install Products page using all special characters. You can use special characters in global search (the **Search Products** field), Basic Search, and Advanced Search.

For more information, see [Searching Assets](#).

Support for Group By in Assets Views for the Installed Products Page

You can now group asset line items on the Installed Products page based on a field from the Asset Line Item object. The **Group By** drop-down is available on the Create New View pop-up while creating views on the Installed Products page.

For more information, see [Installed Products Settings](#) and [Managing Views for Assets Grid](#).

Optimized Performance for Initial Line Loading and Pricing During Asset Termination

You can notice optimized performance for the initial line loading and pricing during asset termination.

Result from a performance testing with 1000 asset lines items in the Install Base

Build	14.2007	14.2007	14.1983
-------	---------	---------	---------

Result from a performance testing with 1000 asset lines items in the Install Base			
Users/Tenants	2 users/1 tenant	1 users/1 tenant	1 users/1 tenant
Total Users	2	1	1
Warmup Run			
Method Name	Timings (seconds)	Timings (seconds)	Timings (seconds)
createProductLineItems	0.1193	0.886	11.947
updateCancelLineInfo	0.137	0.72	0.062
updateTransactionNumbers	0.1	0.2	0
Run 1			
Method Name	Timings (seconds)	Timings (seconds)	Timings (seconds)
createProductLineItems	0.67	0.768	0.816
updateCancelLineInfo	0.7	0.83	0.074
updateTransactionNumbers	0.1	0.1	1

The time taken for the initial load in an old build (May '22 build 14.1983) was **11.947** seconds whereas the time taken for the initial load in a new build (September '22 build 14.2007) is **0.886** seconds. The time taken for a subsequent load in an old build (May '22) was **0.816** seconds whereas the time taken for a subsequent load in a new build (September '22) is **0.768** seconds.

Extra Space Trimming in Expression Builder

CPQ now removes the extra new line or tab after you add and save an expression in the Expression Builder automatically. This feature reduces runtime errors in CPQ because of syntax errors caused by extra space.

Support for 1000 Assets and Service Bundles in Constraint Rules

You can now create constraint rules for Service CPQ with a total of 1000 assets and service bundles. The number of assets and service bundles in constraint rule conditions and constraint rule actions together must not exceed 1000.

For more information, see [Guidelines for CPQ](#).

Support for Product Group and Header Level Scope in Rollup

CPQ now supports **Product Group** and **Header Level** scope in the rollups.

For more information, see [About Manage Rollups Page](#) and [About Rollup Scope](#).

Support to Override Default Option by Constraint Rules

CPQ now overrides the default option selected in an option group when an auto-inclusion constraint rule selects another option in the same option group. CPQ overrides a default option only when the **Max Options** field of that option group is set to *1*. However, CPQ does not override the option you manually selected or was added by a constraint rule.

For more information, see [Creating Constraint Rule Actions](#) and [Associating Options to a Bundle](#).

See Full Grand Total Column Names on Hover

You can now see full names in the help text of column headers when you hover on them in the Grand Total section on the Cart page.

Quote Link in Finalize Completion Email

You can now see a link to the Quote Detail page in the completion email sent after the finalization is completed. If you are upgrading CPQ, you must configure the **SplitCartFinalizeSuccess** email template to see the quote link in the finalize completion

email. Otherwise, if you are installing the CPQ packages for the first time, this feature does not require any configuration.

For more information, see [Adding a Link to Quote in Cart Finalize Notification Email Template](#) and [Finalizing the Shopping Cart](#)

Display Constraint Rule Messages upon Scroll on Configuration Page

CPQ now enables you to display constraint rule messages at the top of the Configuration page when you scroll up and down to select options. You must create and configure the *APTS_EnableStaticConfigMessages* admin setting. The message updates when you change the selection of options.

For more information, see [Configuring Admin Settings](#).

DocuSign OAuth 2.0 Authentication Integration

DocuSign has introduced OAuth 2.0 to secure API requests. If you have integrated CPQ with DocuSign, you must upgrade all the DocuSign-related packages (Conga Quote DocuSign Integration and Conga DocuSign API).

For more information, see [Configuring DocuSign OAuth 2.0 Authentication Integration](#).

Removed Non-Supported Rate Types from the Benefits section of Promotions

The non-supported rate types such as Dimension, Condition, Volume, or Inclusion are no longer visible on the **Rate Type** drop-down while defining benefits for a promotion.

For more information, see [Defining the Benefits of a Promotion](#) and [Creating Price Rules](#).

Support for Flow-based Settings with Configure Products Button for Direct Access to the Configuration Page

CPQ now enables you to use flow-based settings with **Configure Products** button that are configured for direct access to the configuration page. You must use the new URL structure for the **Configure Products** button formula to use the flow-based settings.

For more information, see [Configuring Custom Button to Access Configuration Page Directly](#).

Support for 10000 Line Items in Quote with Enterprise QTC Profile

CPQ now enables you to process a maximum of 10000 line items in quotes where the **QTC Profile** field is set as Enterprise. To finalize more than 1000 line items in the Enterprise quote, you must use the **finalizeCart()** API to finalize the cart. You must also use a custom **Submit for Approval** button to acquire the quote approved.

For more information, see [Configuring Enterprise QTC Profile Value for Quote](#), [Creating Quotes from Opportunities](#), and [Finalizing Configuration in Enterprise and Smart Cart](#).

End of Support

Conga no longer supports the following feature.

Custom Product Attribute Value Extension Objects

Conga no longer provides support for custom Product Attribute Value Ext objects. Instead, you must use the out-of-the-box Product Attribute Value Ext objects in CPQ. The existing custom Product Attribute Value Ext objects work as-is, but Conga will not provide any enhancements and will only fix critical bugs.

Conga recommends you migrate all the attributes from the custom Product Attribute Value Ext object to out-of-the-box Product Attribute Value Ext objects in CPQ. You must not

migrate the attributes partially, as custom and out-of-the-box Product Attribute Value Ext objects cannot be used simultaneously. At a time, you can use attributes either from custom or out-of-the-box Product Attribute Value Ext objects.

For more information, see [Creating Custom Product Attribute Value Extensions](#).

Data Model Changes

The following objects and fields are introduced to or changed in the system or data model in this release.

Object	Fields	Description	System/ User	New/ Changed
Agreement Price Rule		Represents a special pricing rule associated with an agreement or an asset.		Changed
	Contract Number Reference	The contract number associated with the price rule is stored in this field. The rule is associated with a contract number after activation.		New

Fixed Issues

The following table lists the issues fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00054538	CPQ-47091	CPQ does not support Files with Adobe Sign.
00798292	CPQ-56084	When you revalidate a cart, CPQ only removes the inactive parent bundle and leaves the options in the cart. This caused CPQ to calculate the incorrect price.

Case Number	Conga Internal ID	Description
00769693	CPQ-51467	After you define the default cart view for a flow in the CPQ Admin UI, CPQ resets that default cart view to false when you define the default cart view for any other flow.
NA	CPQ-52357	When you adjust the column width on the Cart Grid, CPQ does not display the full value in the column. This happens when you defined Style as <i>text-align:right; width:60px;</i> in Display Column Setting. Resolution info: Update Custom settings > Config System Properties > Column Render Threshold based on the number of columns you add to the Cart page. The default value is 10. For more information, see Config System Properties .
NA	CPQ-54948	When you add more than 500 Service CPQ line items that satisfy constraint rules, CPQ displays the character limit error. Resolution info: CPQ has been enhanced to support 1000 assets in the constraint rule. For more information, see the Enhancement section.
NA	CPQ-56934	Turbo Integrations: The Cart page stops working when you provide negative quantity for a product on the cart.

The following table lists the known issue fixed from the previous release.

Conga Internal ID	Description
CPQ-55159	Turbo Integrations: After a hard revalidation, CPQ performs soft revalidation automatically.
CPQ-55272	Turbo Integrations: When you delete the secondary PLI of a bundle product, remove an existing option product, add a new option product to the bundle, and perform hard revalidation on the bundle product, you cannot finalize the quote.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-58544	You cannot finalize the Cart after revalidating the expired or inactive price list item (primary) of a product.
CPQ-55186	Turbo Integrations: After you save or finalize the configuration, the Product Configuration status is set as New instead of Saved/Finalized.
CPQ-54278	Turbo Integrations: You encounter the following error while finalizing the revalidated cart if the revalidation callback is configured in your org: <i>entity is deleted</i>
CPQ-54022	Turbo Integrations: Attribute-based pricing does not work for numeric expressions.
CPQ-49315	Config asset pricing criteria do not function on a single-ramp renewed line (renew one ramp = true).
CPQ-61255	After upgrading to September '22 release, when you use CPQ Console in Salesforce UI to update option details like the Default or Modifiable Quantity fields, CPQ displays an error. Workaround: Conga recommends you to use CPQ Admin UI to configure CPQ. This includes tasks to create a product, and associate the product with products, categories, price lists, and price list items. For more information on CPQ Admin UI, see .Navigating the CPQ Admin User Interface vSeptember-22 .
