In these release notes, you can find packages, requirements, features, enhancements, fixed issues, and known issues for the Configure Price Quote June23.03.22 release. For documentation updates, see [What's New in Configure Price Quote Documentation](#).

 This documentation may describe optional features for which you have not purchased a license; therefore your solution or implementation may differ from what is described here. Contact your customer success manager (CSM) or account executive (AE) to discuss your specific features and licensing.

To access the learning path, including overviews and demonstrations of this release's updated features and enhancements, visit the [Conga Learning Center](#).

Packages

The following packages and dependencies are required to upgrade to this release and use its new features. These are the minimum required versions; later versions are also supported. Prerequisites for each feature can be found in its documentation. Packages marked (New) are new for this release.

i You can register your org for Conga Push Upgrade. Conga Push Upgrade is an automated tool that upgrades packages available in your Salesforce org (production or sandbox) to the latest versions. In addition, it ensures that all the Conga published managed packages are on the latest versions for your registered orgs. For more information, see [Registering for Conga Push Upgrade](#).

Package	Latest Certified Version	
	Name	Number
Conga Approvals (Required if you are using Approvals)	14.1.371	14.371.16
Conga Base Library (Required if you are using Conga Configuration & Pricing)	4.1.245.1	4.245.1
Conga Billing (Required if you are using Conga Billing) (New)	9.1.345.10	9.345.10
Conga CLM Configuration Integration (Required if you are using CLM)	15.1.0181.8	15.181.8
Conga Configuration & Pricing (New)	15.1.2090.83	15.2090.83
Conga Contract Lifecycle Management	14.1.709.6	14.709.6
Conga CPQ Api	15.0.0131.7	15.131.7

Conga Quote DocuSign Integration	4.1.23	4.23
Conga Quote Echosign Integration (You must install the latest Adobe Sign package to use this package)	3.1.17	3.17
Conga Quote Management (Required if you are using Proposal Management)	13.1.0266.2	13.266.2

System Requirements and Supported Platforms

For requirements and recommendations to consider before installing the Conga product suite, see the [System Requirements and Supported Platforms Matrix](#).

New Features and Enhancements

The following features are new to Conga Configure Price Quote in this release.

Apex CPU Time Limit in Bulk Line Item Updates

When dealing with bulk updates involving 5000 line items, users encountered Apex CPU time limit errors triggered by the `LineItemCurrencyTrigger`.

In Apex, use the following method to bypass the trigger:

- To perform the bulk update:
`Apttus_Config2.RuntimeContext.getParameters().put('isBulkLineItemUpdate', 'true')`
- To remove the parameter:
`Apttus_Config2.RuntimeContext.getParameters().remove('isBulkLineItemUpdate')`

Fixed Issues

The following issues are fixed in this release. If any actions are required, they will be listed in this table.

Case Number	Conga Internal ID	Description
00875892	CPQ-78787	When the system rounded prices to five digits by default, it caused incorrect 'net adjustment%' on line items.
00876983	CPQ-78770	Despite selecting the required item in the sub-option group, configurations with a main option group requiring a minimum selection of at least one display the error message. Error: Missing product selection
00877468	CPQ-78764	The price Override section opened in the Price Waterfall even if Allowable Action was set to <i>No Adjustment</i> in the Price Pipeline Ruleset.
00873929	CPQ-78679	When an Inclusion Constraint Rule depends on another Prompt Rule, the system fails to include the product when the conditional item is added from the prompt.
00870999	CPQ-77387	When adding the same product multiple times simultaneously, pricing became incorrect with the 'Cumulative Range' dimension type.
00864342	CPQ-75845	When utilizing a price matrix of Dimension type with two dimensions (Quantity and Region), discrepancies in tiering result in incorrect values displayed in the cart UI.
	CPQ-70922	Selecting assets and adding service bundles via custom UI failed to create RLIs or invoke constraint rules when configuring bundles from the mini cart. Worked correctly only when adding bundles individually after clicking "Configure".

Known Issues

The following unresolved issues are known to Conga at the time of this release.

Conga Internal ID	Description
CPQ-80002	Attachments are not properly attached to emails when sending proposals, leading to incomplete proposal submissions.
CPQ-79972	When navigating back to the cart page from the price waterfall, the below error occurs. <code>Error: Duplicate id in list</code>
CPQ-79307	When trying to assign collaboration for multiple lines at once, the queue details did not display in the UI when "Product Collaboration" was selected for the second time.
