System Requirements and Supported Platforms

Conga X-Author Migration Manager is a Microsoft Word Add-In that is accessed via Microsoft Word application on your Windows machine. For the X-Author Migration Manager Add-In to work, the Conga Contract Management package must be installed in your Salesforce Org. This is required so that the various dialog boxes available in X-Author Migration Manager can display the correct fields. Once this is done by your system administrator, you will be able to install the X-Author Migration Manager Add-In and begin using it.

- You cannot use a Mac OS X operating system with X-Author Migration Manager; however, it can be used with a Mac running a Windows Virtual Machine in a Citrix environment.
- Microsoft's Office 365 Online or Cloud applications do not support plugins; therefore, the Apttus X-Author Migration Manager can only be used in a Windows desktop environment.
- New features and technologies are continuously deployed in new releases by Apttus X- Author Migration Manager, and they are supported by Apttus where the associated Microsoft OS and/or Microsoft Office versions are also still supported by Microsoft. As Microsoft ends its own support for any OS and/or Office version, subsequent new Apttus releases will no longer be developed, tested, or committed to support the application on any Microsoft OS and/or Office version which is no longer supported by Microsoft.
