About Release Notes

Apttus Release Notes contain the following information about this release:

- [Packages](#) that are required to upgrade to this release
- [Feature Summary](#): high-level descriptions of new features and enhancements to existing features, with links to Get Started topics to help you set up and use the new feature or enhancement
- [Resolved Issues](#)
- [Known Issues](#)

This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following packages and dependent packages are required to upgrade to this release to utilize all the new features of this release. These are the *minimum* required versions; later versions are also supported. Separate pre-requisites per feature can be found in the respective guides. The packages marked as **(New)** are new packages in this release.

Product	Latest Certified Version
X-Author Contracts (New)	9.0.0501

Feature Summary

The following features are new to X-Author Contracts in this release.

Toolbar Button to Refresh Clause References

X-Author Contracts is introducing a new toolbar button **Update References** in the X-Author Contracts ribbon tab in Microsoft Word, to refresh the references in an agreement document. This button will allow the contract negotiators to update the references used in table of content, headers and footers, cross-references, bookmarks, and formulas in the tables in the document.

Resolved Issues

The following table represents resolved issues in this release:

Case Number	Description	Apttus Internal ID
X-Author Contracts 9.0.0501		
202112	When a user inserted an FX2 format clause in a checked out agreement document of FX2 format, the other sections/ clauses with numbered bullets lost their numbering. This issue has been resolved.	XA-1950
209896	When a user inserted a clause which had reference to a paragraph, in a generated agreement, the reference to the paragraph within the inserted clause was not correct. This issue has been resolved.	XA-2359
	When a user added an inline clause in a template and made it conditional, the agreement generated with that template did not contain the conditional clause even though the agreement met the conditions of the clause. This issue has been resolved.	XA-2387

The following table represents issue resolved from the previous release:

Case Number	Description	Apttus Internal ID
207879	When a user checked in a template with more than 200 clauses, the Clause Reference related list in Salesforce did not show all the clause references and some of the clause references disappeared. This issue has been resolved.	XA-2349

Known Issues

The following table represents known issues:

Apttus Internal ID	Issue
X-Author Contracts 9.0.0501	
XA-2260	After changing the content of a marked clause and viewing it in control panel by clicking Show Changes , removes one character from the clause in the changes screen.
XA-2307	When a user performs Update from Salesforce action on a generated agreement document which does not have values for the first column of the repeating table, then X-Author Contracts shows a blank screen.
XA-2316	Performing Refresh/ Publish action in a template shifts the header/ footer clause content to the main clause content.
XA-2327	When a user performs reconciliation on checking in an agreement document having a clause with multiple instances of a currency type smart field with different currency formats, X-Author updates all the instances of the smart currency field in the clause to a single currency format.
CLM-2482	When a user selects an agreement document from the Search by User results while checking out an agreement document in X-Author Contracts, the agreement document fails to check out.
XA-1931	After checking in a combined document, X-Author ribbon menu items are getting disabled for the original document. Checking out the original document will enable menu items.

Apttus Internal ID	Issue
XA-1932	When a user attempts to check in a merged document where the original document was non-version-aware, an error is displayed stating that the document is already checked out. The currently recommended workaround is to append the document name at check-in to prevent this error.
