# About Release Notes

These Release Notes contain the following information about Conga TurboEngines Summer20.11.20 release.

For more information on new features, enhancements, and document improvements refer to

- [What's New](#) in *Apttus TurboEngines Summer 2020 Administrator Guide* or
  - [What's New](#) in *Apttus TurboEngines Summer 2020 REST API Guide*
- [Packages](#): Lists packages that are required to upgrade to this release of the product
  - [System Requirements and Supported Platforms](#): Lists requirements and recommendations for installing this release
  - [New Features](#): Provides high-level descriptions of new features introduced in this release, with links to more detailed information
  - [Enhancements](#): Provides high-level descriptions of enhancements to existing features
  - [Resolved Issues](#): Lists customer-reported issues that are resolved in this release or known issues resolved from previous releases
  - [Known Issues](#): Lists known issues that are applicable in this release

 This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

# Packages

The following packages and dependent packages are required to upgrade to this release to utilize all the new features of this release. These are the *minimum* required versions; later versions are also supported. Separate prerequisites for each feature can be found in the respective guides. The packages marked as **(New)** are new in this release.

Product	Latest Certified Version <i>(Version Name   Version Number)</i>
Conga Base Library	1.1.93.3   1.93.3

 Before installing or upgrading Conga managed packages, you must review the dependency matrix for each managed package. You can refer to the package dependency matrix at [Packages Dependency Matrix](#).

00108169	CPQ-46234	The <b>Finalize</b> action did not enable on the cart page after completing the pricing.

## Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
CPQ-43964	The pricing status and grand total were not getting updated after adding a line item using the copy option.
CPQ-45457	The <b>Finalize</b> action is not enabled when you revert approval required check.
CPQ-45472	<p>The validation error message still appears after repricing.</p> <p>When the validation callback class invoked, the validation call back class gives an error message If any condition of the validation class is not satisfied, the error message does not disappear.</p> <p>Resolution: Ignore the error message if the conditions of the validation class are matched.</p>
LS-3746	A user has the ability to view and add invalid fields in the Add Objects window.
LS-3789	Adding SFDC OOTB objects that do not support PK chunking could cause sync to fail.
LS-3815	A user can view invalid fields in the Add Objects list.
CPQ-44694	The price factor (Bundle Only) adjustment is not supported.
CPQ-44665	Line item formula fields dependent on Salesforce default value fields should be added under view cart custom fields and custom pricing fields in config system properties.
CPQ-44599	Promotions with the "Contains" operator in criteria does not work.
CPQ-44779	Replacement Rules based on criteria does not execute until the user clicks on finalize.
CPQ-44752	Getting "Price Pending" error on "Finalize" when Option with price method "Flat Price" is added under bundle and option quantity is updated, repriced, and then finalized.
CPQ-44836	Option to Option exclusion constraint rule is not supported.

Conga Internal ID	Description
CPQ-44615	Usage Price Tiers are not shown within the popup for the finalized cart.
CPQ-44767	Line Items are not shown on the cart page when it is added with the filter condition.
CPQ-44671	Line item objects do not get updated in backend after reprice. Set APTS_AlwaysSaveAfterTurboPrice admin setting to true to see the expected behavior.
CPQ-43929	User needs to reprice if products are added from inclusion prompt.
CPQ-44832	A feature flag called "Enable Selling Term Rounding" does not work partially.
CPQ-44827	User is unable to finalize if they have "Check on Finalization" type of constraint rule.
CPQ-44817	The update cart line items request is sending a pricing status of complete, however, the response has the pricing status flipped back to pending.
CPQ-44773	Manual adjustment on option product calculates the wrong price for another option.
CPQ-44824	Auto-included primary line products are not getting auto-removed when you remove the condition product. This behavior is observed when Constraint Rule Execution Mode is set as either CMS or Server.
CPQ-44823	The user is unable to select option product quickly on the configuration page. This behavior is observed when Constraint Rule Execution Mode is set as either CMS or Server.
