- [Known Issues](#): Lists known issues that are applicable in this release

 This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following packages and dependent packages are required to upgrade to this release to utilize all the new features of this release. These are the *minimum* required versions; later versions are also supported. Separate prerequisites for each feature can be found in the respective guides. The packages marked as **(New)** are new packages in this release.

Product	Latest Certified Version <i>Version Name / Version Number</i>
Apttus Supplier Relationship Management (New)	8.0.0056 8.56
Apttus Scorecard Management	3.0.0022 3.22
Apttus Contract Management	9.2.0417.8 9.417.8

System Requirements and Supported Platforms

The following table lists the minimum requirements for installing and Apttus Source to Pay.

System Requirement	Minimum Supported Version
Operating System	Standard Salesforce.com requirements. See Salesforce PDF .
Browser	<p>Apttus supports the following browsers:</p> <ul style="list-style-type: none">• Google Chrome• Microsoft Edge <p>Apttus recommends the latest stable version of the browser for the best performance.</p> <div style="border: 1px solid #f0e68c; padding: 5px;"><p> Internet Explorer is not supported.</p></div>

New Features

There are no new features in Source to Pay in this release.

Enhancements

The following section describes existing features that are changed (or are no longer supported) in this release.

- [Sourcing Event Id Link](#)
- [Adding RFQ questions after Submitting Responses](#)

Sourcing Event Id Link

You now have an Event ID link on the score card page to take you to the sourcing events page. This makes it easier to switch between the scorecard page for a supplier and the sourcing event page, to review the RFI or RFQ responses. However, if a score card is not mapped to any sourcing event, this field will be hidden.

Adding RFQ questions after Submitting Responses

You can now add questions in the RFQ after the suppliers have submitted their RFQ responses. You can also request responses for the new RFQ questions for the portal suppliers. For the non-portal suppliers, the Buyer can now access the updated RFQ questions and submit the RFQ responses on the supplier's behalf.

Resolved Issues

The following table lists the issues resolved in this release.

Case Number	Apttus Internal ID	Description
N/A	SRM-1146	When you entered the RFI responses on behalf of the non-portal suppliers and the response were longer than 255 characters, you saw an error. This issue is now resolved.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Apttus Internal ID	Issue
SCM-1097	When a user deletes a Supplier(s) from a Master Scorecard and then saves the Scorecard, the Supplier(s) entry is not deleted after saving.
SCM-1046	For a sourcing event which has more than 10 RFQ question, the suppliers (Public suppliers) are unable to respond to more than 10 questions as pagination is not available on RFQ response creation page.
SCM-991	<p>When a user tries to download files that are more than 25 MB (collectively) in size, Download All functionality does not work, and the user cannot download the files collectively. The user has to download them individually.</p> <p>Workaround: User can select the files in such a way that the total of the selected files does not exceed 25 MB. Either user can download them individually, or select the files in such a way that total remains less than 25 MB.</p>
SCM-629	The Advanced Approvals package is not integrated with the Source to Pay package.
