Apttus also recommends its customers to use Microsoft Edge as the browser of choice.</p> <div style="border: 1px solid #f1c40f; padding: 5px; margin-top: 10px;"> <p> Internet Explorer is not supported.</p> </div>

### Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Installing Apttus Partner Commerce Package](#) in [Partner Commerce on Salesforce Implementation and Deployment Guide](#).

## New Features

There are no new features in this release.

## Enhancements

The following section describes existing features that are changed (or are no longer supported) in this release.

- [Sequencing Support for Options, Attributes, Attributes Groups, and Option Groups](#)
- [Ability to Hide Option Groups and Options](#)
- [Support for Modifying Option Groups and Options Within a Bundle Configuration](#)
- [Support for Required Checkbox for Options](#)

### Sequencing Support for Options, Attributes, Attributes Groups, and Option Groups

The product configuration page now displays Attributes, Options, Options Groups, and Attribute Groups in a proper sequence leveraging CPQ metadata information.

### Ability to Hide Option Groups and Options

With this release, you can now completely hide an option group and its options within it from the user interface.

- Select the **Is Hidden** flag from the Option Group Configuration page to hide option groups.
- Use the exclusion type constraint rules to hide excluded options from the list. You must set up the Action Intent as Hide in the Constraint Rule Action.

#### Get Started

For details on hiding option groups and options, refer to [Product Configuration](#) in *Partner Commerce on Salesforce Winter 2019 User Guide*.

### Support for Modifying Option Groups and Options Within a Bundle Configuration

In a Bundle configuration, from the Option Group configuration, you can now select **Modifiable Type** setting with values Fixed and Variable.

- Selecting Variable enables you to change the quantity of the option products while configuring the product.
- Selecting Fixed restricts you from changing the quantity of the option products inside the parent option group.

Setting the Modifiable Type setting to Fixed or Variable impacts only on immediate options. There is no impact on the sub option groups. You must set it on each option group level. This also overrides the minimum and maximum validation.

#### Get Started

For details on using the Modifiable Type setting, refer to [Product Configuration](#) in *Partner Commerce on Salesforce Winter 2019 User Guide*.

## Support for Required Checkbox for Options

With this release, when you select the **Required** flag for an option product in CPO, it is considered in Partner Commerce. When you select the **Required** checkbox, it is selected by default in the configuration.

 If there is a minimum quantity of 0 specified on the required option, the minimum quantity is ignored. The default quantity is 1 and you cannot change the quantity to 0.

### Get Started

For details on using required checkbox for options, refer to [Product Configuration](#) in *Partner Commerce on Salesforce Winter 2019 User Guide*.

## Data Model Changes

This release does not have any data model changes for Partner Commerce.

## Resolved Issues

The following table lists the issues resolved in this release.

Case Number	Apttus Internal ID	Description
N/A	DC-4330	Clicking the Generate Order button, failed to generate the order document.
N/A	DC-4331	Notification email was not sent upon generating order from the Order Details page.

## Known Issues

The following table provides the cumulative list of known issues up to this release.

Apttus Internal ID	Description
DC-4506	You can add a product to the cart and also update the configuration even when the Required Option checkbox is not selected.
