About Release Notes

Apttus Release Notes contain the following information about Partner Commerce Spring 2020 Release on Salesforce.

- ✓ For more information on new features, enhancements, and document improvements refer to
 - [What's new](#) in *Partner Commerce on Salesforce Spring 2020 Implementation and Deployment Guide*.
 - [What's new](#) in *Partner Commerce on Salesforce Spring 2020 User Guide*.
 - [What's new](#) in *Partner Commerce on Salesforce Spring 2020 REST API Guide*.

- [Packages](#): Lists packages that are required to upgrade to this release of the product
- [System Requirements and Supported Platforms](#): Lists requirements and recommendations for installing this release
- [New Features](#): Provides high-level descriptions of new features introduced in this release, with links to more detailed information
- [Enhancements](#): Provides high-level descriptions of enhancements to existing features
- [Data Model Changes](#): Lists changes to the data model
- [Resolved Issues](#): Lists customer-reported issues that are resolved in this release or known issues resolved from previous releases
- [Known Issues](#): Lists known issues that are applicable in this release

- i This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following packages and dependent packages are required to upgrade to this release to utilize all the new features of this release. These are the *minimum* required versions; later versions are also supported. Separate prerequisites for each feature can be found in the respective guides. The packages marked as **(New)** are new packages in this release.

Product	Latest Certified Version <i>Version Name / Version Number</i>
Conga Contract Lifecycle Management	9.3.0432.5 9.432.5
Conga Partner Commerce	1.0.0000 1.0
Conga Digital Commerce (New)	4.0.52 4.52 Spring 2020
Conga Digital Commerce SDK (New)	2001.0.125 (2001)
Conga Quote Management (New)	9.2.0206 9.206
Conga Base Library (New) (Pre-requisite for Installing Conga Configuration & Pricing)	1.0.36 1.36
Conga Configuration & Pricing (New)	12.0.1715 12.1715
Conga Quote Configuration Integration (New)	11.2.0312 11.312
Conga CPQ Setup	11.1.39 11.39
Conga CPQ API (New)	12.0.0099 12.99
Conga Promotions (Required if you are using Promotions)	1.0.0000 1.0
Conga Quote -Asset Integration (Required if you are using Assets Based Ordering)	6.5.0014 6.14

Product	Latest Certified Version <i>Version Name / Version Number</i>
Conga Order Management (Required only if Partner Commerce package is installed)	1.0.0000 1.0
Conga Billing	5.1.0158 5.158

i Before installing or upgrading Apttus managed packages, you must review the dependency matrix for each managed package. You can refer to the package dependency matrix at [Packages Dependency Matrix](#).

System Requirements and Supported Platforms

The following table lists the minimum requirements for installing and using Partner Commerce.

System Requirement	Minimum Supported Version
Operating System	Standard Salesforce.com requirements. See Salesforce PDF .
Browser	<p>Apttus supports the following browsers:</p> <ul style="list-style-type: none"> • Microsoft Edge • Google Chrome <p>Apttus recommends the latest version of the browser for the best performance. Apttus also recommends its customers to use Microsoft Edge as the browser of choice.</p> <div style="border: 1px solid #f0e68c; padding: 5px; margin-top: 10px;">  Internet Explorer is not supported. </div>

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading Partner Commerce](#) in *Partner Commerce on Salesforce Implementation and Deployment Guide*.

New Features

The following feature is new to Partner Commerce in this release.

- [Headless Partner Commerce REST APIs](#)

Headless Partner Commerce REST APIs

Introducing Headless Partner Commerce “service” that enables rapid experience-first commerce development and web applications. REST APIs allow your front-end to interface with core e-commerce functionality like cart, checkout, as well as provides data object access to entities like a product, product configurations, storefront and more.

Get Started

For details on E-Commerce REST APIs, refer [CPQ REST API](#) in *Partner Commerce on Salesforce Spring 2020 REST API Guide*.

Enhancements

The following section describes existing features that are changed (or are no longer supported) in this release.

- Updated Standard Table and Chart Components in Asset-Based Ordering
- Updated Cart List Page
- Ability to Hide Option Groups and Options
- Support for Modifying Option Groups and Options Within a Bundle Configuration
- Support for Required Checkbox for Options
- Sequencing Support for Options, Attributes, Attributes Groups, and Option Groups

Updated Standard Table and Chart Components in Asset-Based Ordering

The Installed Products page is updated to use the standard table and chart components from the elements library. You can view the *Assets By Price Type* and *Asset Amounts By Price Type* charts on the Installed Product page.

The Installed Product page can show the entire inventory of your assets; therefore, you can use the following filters available on the page to find a particular asset:

- Days to Renew
- Price Type
- Asset Action
- Product Family
- Advanced Filters ()
- Search Assets ()

You can also use a combination of filters to refine your asset list.

Get Started

For details on the standard table and chart component update, refer to [Assets](#) in *Partner Commerce on Salesforce Spring 2020 User Guide*.

Updated Cart List Page

The cart list page is updated to use the standard table component instead of a custom table.

You can see the cart details after logging into Partner Commerce. The Carts home page or My Carts page lists all carts that you have created for the selected account. The cart list page shows the carts with the following details:

- Configuration Name
- Created Date
- Number of Items
- Is Active
- Total Amount
- Status

From the My Carts page, you can:

- Create a cart
- Search a cart
- Delete a cart
- Set a cart as active
- Sort the cart list
- Set pagination

Get Started

For details on validation constraint rules, refer to [Managing the Cart](#) in *Partner Commerce on Salesforce Spring 2020 User Guide*.

Ability to Hide Option Groups and Options

You can now completely hide an option group and the options within it from the user interface.

- Select the **Is Hidden** flag from the Option Group Configuration page to hide option groups.
- Use the exclusion type constraint rules to hide excluded options from the list. You must set up the Action Intent as Hide in the Constraint Rule Action.

Get Started

For details on hiding option groups and options, refer to [Product Configuration](#) in *Partner Commerce on Salesforce Spring 2020 User Guide*.

Support for Modifying Option Groups and Options Within a Bundle Configuration

In a Bundle configuration, from the Option Group configuration, you can now select the **Modifiable Type** setting with values Fixed and Variable.

- Selecting Variable enables you to change the quantity of the option products while configuring the product.
- Selecting Fixed restricts you from changing the quantity of the option products inside the parent option group.

Setting the Modifiable Type setting to Fixed or Variable impacts only on immediate options. There is no impact on the sub-option groups. You must set the modifiable type setting on each option group level. This also overrides the minimum and maximum validation.

Get Started

For details on using the Modifiable Type setting, refer to [Product Configuration](#) in *Partner Commerce on Salesforce Spring 2020 User Guide*.

Support for Required Checkbox for Options

With this release, when you select the **Required** flag for an option product in CPQ, it is considered in Partner Commerce. When you select the **Required** checkbox, it is selected by default in the configuration.

 If there is a minimum quantity of 0 specified on the required option, the minimum quantity is ignored. The default quantity is 1 and you cannot change the quantity to 0.

Get Started

For details on using required checkbox for options, refer to [Product Configuration](#) in *Partner Commerce on Salesforce Spring 2020 User Guide*.

Sequencing Support for Options, Attributes, Attributes Groups, and Option Groups

The product configuration page now displays Attributes, Options, Options Groups, and Attribute Groups in a proper sequence leveraging CPQ metadata information.

The Option Group sequence ONLY considers the root sequence field available in Salesforce. The option groups are displayed sequentially, irrespective of the current option group level.

The option groups at the root level are displayed similar to the one's in Apttus CPQ. However, option groups that are not at the root level are arranged as per the value of its corresponding root sequence field. Example: Lesser the value, higher the sequential position in the product configuration user interface.

Data Model Changes

The following objects and fields are introduced to or changed in the system or data model in this release.

The System/User indicates whether the field is used by the System only (System), or if the field may be used for integration updates (User). The below given all fields are consumed by Users and updated by System.

Object	Fields	Description	System/ User	New/ Changed
Storefronts				Changed
	Guest Username	Email ID of the guest user.	User	New
	Guest Password	Password of the guest user.	User	New

Resolved Issues

There are no resolved issues in this release.

Known Issues

There are no known issues in this release.

Apttus Copyright Disclaimer

Copyright © 2021 Apttus Corporation (“Apttus”) and/or its affiliates. All rights reserved.

No part of this document, or any information linked to or referenced herein, may be reproduced, distributed, or transmitted in any form or by any means, including photocopying, recording, or other electronic or mechanical methods, without the prior written consent of Apttus. All information contained herein is subject to change without notice and is not warranted to be error free.

This document may describe certain features and functionality of software that Apttus makes available for use under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not, in any form, or by any means, use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part of the software. Reverse engineering, disassembly, decompilation of, or the creation of derivative work(s) from, the software is strictly prohibited. Additionally, this document may contain descriptions of software modules that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document.

U.S. GOVERNMENT END USERS: Apttus software, including any operating system(s), integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Neither the software nor the documentation were developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Apttus and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Apttus and X-Author are registered trademarks of Apttus and/or its affiliates.

The documentation and/or software may provide links to Web sites and access to content, products, and services from third parties. Apttus is not responsible for the availability of, or any content provided by third parties. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the

relationship is directly between you and the third party. Apttus is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Apttus is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading Partner Commerce](#) in *Partner Commerce on Salesforce Implementation and Deployment Guide*.

New Features

There are no new features in this release. Keep checking the Apttus Documentation Portal for new updates.

Enhancements

There are no enhancements in this release.

Data Model Changes

This release does not have any data model changes for Partner Commerce.

Resolved Issues

The following table lists the issues resolved in this release.

Case Number	Apttus Internal ID	Description
00099314	DC-4673	Setting the options/bundle as Default under an option group (with Is Hidden flag set to True) did not add the nested bundle and options product to the cart.
NA	DC-5399	When a guest user opened the Partner Commerce application in another or different browsers and added a product to the cart, the application used existing configuration instead of creating a new cart.

Known Issues

There are no known issues in this release.
