Apttus also recommends its customers to use Microsoft Edge as the browser of choice.</p> <div style="border: 1px solid #f0e68c; padding: 5px; margin-top: 10px;"> <p> Internet Explorer is not supported.</p> </div>

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Installing Apttus E-Commerce Package](#) in Digital Commerce on Salesforce Implementation and Deployment Guide.

New Features

There are no new features in this release.

Enhancements

The following section describes existing features that are changed (or are no longer supported) in this release.

- [Updates to Guest User Activity Due to Salesforce Critical Update](#)
- [Hiding Option Groups and Options](#)
- [Support for Modifying Option Groups and Options Within a Bundle Configuration](#)
- [Support for Required Checkbox for Options](#)

Updates to Guest User Activity Due to Salesforce Critical Update

Salesforce released a new patch that restricts Guest User Access. Apttus has enhanced Digital Commerce SDK to consider guest created carts. To enable guest user flows, a new Secure guest user record access flag is introduced. By default, this flag is turned off in the sharing settings preventing the guest user to add products to the cart. The Add to Cart button is disabled.

Get Started

For details on the new feature flag, refer to [Managing Permissions for Secure Guest User Access to Storefront](#) in *Digital Commerce on Salesforce Summer 2019 User Guide*.

Hiding Option Groups and Options

With this release, you can now hide an option group and options within it completely from the user interface. For this, the Is Hidden flag must be checked on the option group configuration page to hide option groups.

To hide options, you can use exclusion type constraint rules to hide excluded options from the list. You must set up the Action Intent as Hide in the Constraint Rule Action.

Get Started

For details on hiding option groups and options, refer to [Product Configuration](#) in *Digital Commerce on Salesforce Summer 2019 User Guide*.

Support for Modifying Option Groups and Options Within a Bundle Configuration

In a Bundle configuration, from the Option Group configuration, the setting Modifiable Type with values Fixed and Variable is supported. Selecting Variable enables you to change the quantity of the option products while configuring the product. Selecting Fixed restricts you from changing the quantity of the option products inside the parent option group.

Setting the modifiable type setting to Fixed or Variable impacts only on immediate options. There is no impact on the sub option groups. This setting has to be done on each level. This also overrides minimum and maximum validation.

Get Started

For details on using modifiable type setting, refer to [Product Configuration](#) in *Digital Commerce on Salesforce Summer 2019 User Guide*.

Support for Required Checkbox for Options

With this release, when you check the Required flag for an option product in CPQ, it is considered in Digital Commerce application. When the Required checkbox is checked, then in the configuration, it should be checked by Default.

 If there is a minimum quantity of 0 specified on the required option, the minimum quantity is ignored. The default quantity is 1 and you cannot change the quantity to 0.

Get Started

For details on using required checkbox for options, refer to [Product Configuration](#) in *Digital Commerce on Salesforce Summer 2019 User Guide*.

Data Model Changes

This release does not have any data model changes for Digital Commerce.

Resolved Issues

There are no resolved issues in this release.

Known Issues

There are no known issues in this release.
