New Features

There are no new features in this release.

Enhancements

There is following new enhancement in this release.

Minimum and Maximum Product Validation Support

Minimum and maximum options configuration now works at all levels of option groups. Also, minimum and maximum product quantity validation now works for level 1 of option groups. The product details page and the Cart details page also shows validation errors for the unfulfilled min and max option configuration. The **Add to Cart** button on product details page and the **Place Order** button on the cart details page is disabled until you resolve all the validation errors.

Data Model Changes

This release does not have any data model changes for Digital Commerce.

Resolved Issues

The following table lists the issues resolved in this release.

Case Number	Apttus Internal ID	Description
N/A	DC-3926	Minimum and maximum product quantity validation was not working on level-1 option group products.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Apttus Internal ID	Description
DC-3586	Manual promotion was not automatically removed when you updated the product quantity so that the promotion criteria was no longer fulfilled. This happened specifically when there was only one manual promotion applied.
DC-3833	After auto promotion was applied and removed, you could not apply manual promotion.
