Conga Configuration & Pricing (New)	12.1.1787.107 12.1787.107
Conga Quote Configuration Integration (New)	12.1.0332.9 12.332.9
Conga CPQ Setup	12.1.61.3 12.61.3
Conga CPQ API	12.1.0104 12.104
Conga Promotions (Required if you are using Promotions)	1.0.0000 1.0
Conga Quote Asset Integration (Required if you are using Assets Based Ordering)	6.5.0014 6.14
Conga Order Management	1.0.0000 1.0
Conga Billing Management	6.2.238.1 6.238.1

 Before installing or upgrading Conga managed packages, you must review the dependency matrix for each managed package. You can refer to the package dependency matrix at [Packages Dependency Matrix](#).

System Requirements and Supported Platforms

The following table lists the minimum requirements for installing and using Digital Commerce.

System Requirement	Minimum Supported Version
Operating System	Standard Salesforce.com requirements. See Salesforce PDF .
Browser	<p>Conga supports the following browsers:</p> <ul style="list-style-type: none">• Microsoft Edge• Google Chrome <p>Conga recommends the latest version of the browser for the best performance. Conga also recommends its customers to use Microsoft Edge as the browser of choice.</p> <div style="border: 1px solid #f9c94d; padding: 5px; margin-top: 10px;"><p> Internet Explorer is not supported.</p></div>

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see [Upgrading Digital Commerce](#) in *Digital Commerce on Salesforce Implementation and Deployment Guide*.

New Features

The following features are new to Digital Commerce in this release.

New Convert Currency Pipe

A new pipe named ***ConvertCurrencyPipe*** is introduced to perform client-side currency conversion for aggregate fields or any fields where Salesforce limits the results to default currency on the org. The pipe `ConvertCurrencyPipe` is part of the Digital Commerce SDK and exposed to templates and its usage is aligned to the Angular standards of calling currency pipe.

Example 1:

```
<span>{{ 5.55 | convertCurrency | async }}</span>
```

`<!-- Renders $5.55 -->` When no parameters are passed to the pipe, it converts and displays the currency based on the one defined on the Price List.

Example 2: (Specify currency ISO code)

```
<span>{{65.23 | convertCurrency: 'EUR' | async}}</span>
```

`<!-- Renders €65.23 -->` You can pass any currency code to the pipe, to convert the values to. Based on the conversion rates defined in the org, the pipe does the conversion and displays currency values.

The following optional parameters can also be passed into this pipe to control the decimal representation, currency symbol, and more.

Parameters	Description
<code>display</code>	Displays the currency symbol. It can take values like code, symbol, symbol-narrow, a customized string, or a boolean. The default is symbol-narrow.
<code>digitsInfo</code>	A string representing the decimal part of the currency value.

Get Started

For details on the `ConvertCurrencyPipe`, refer to the [Modules > PricingModule > Pipes > ConvertCurrencyPipe section](#) of the *Conga Digital Commerce SDK*.

Addition of a New Input Property to Chart Components

A new (optional) input property has been added to our chart component to allow you to define the currency values you wish to see on the dashboard components.

Example: `<apt-chart [currencyConversionCode]="EUR"> </apt-chart>`

If no input is provided, the currency conversion is driven by the default currency specified in the configuration files.

Get Started

For details on the new input property, refer to the [Components > Chart Component](#) section of the *Conga Digital Commerce SDK*.

Introducing CPQ REST API Version 3

CPQ REST API Version 3 is a performance-based version with modifications to the response structure.

 *CPQ REST API Version 3 only supports CPQ Pricing. Also, the SDK is integrated with Version 3.*

Get Started

For more details on Digital Commerce REST APIs, refer to [CPQ REST API Version 3](#) in *Digital Commerce on Salesforce Summer 2020 Patch 1 REST API Guide*.

Enhancements

There are no new enhancements in this release.

Data Model Changes

This release does not have any data model changes for Digital Commerce.

Resolved Issues

The following table lists the issues resolved in this release.

Case Number	Conga Internal ID	Description
00113197	DC-6437	The related categories link was not working after selecting the Sub-Category.
00112740	DC-6365	Under the billing address section, clicking the Bill To lookup displayed the same account twice on the checkout page.
00112554	DC-6314	Default options are displayed even though no defaults are defined.
00112093	DC-6273	<p>Incorrect amounts were displayed on the Dashboard in a multi-currency org. This issue is now resolved.</p> <p>Resolution: Two new features are added to the Digital Commerce SDK to support multi-currency setup. For details, see New Features.</p>
00110938	DC-6172	While navigating a category, after reaching the leaf node, clicking the Back link in the left category navigation panel turns blank.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
DC-5903	TurboPricing integration supports up to 20 line items for the price calculation.
