ⓘ Before installing or upgrading Conga managed packages, you must review the dependency matrix for each managed package. You can refer to the package dependency matrix at Packages Dependency Matrix.

System Requirements and Supported Platforms

The following table lists the minimum requirements for installing and using Digital Commerce.

System Requirement	Minimum Supported Version
Operating System	Standard Salesforce.com requirements. See Salesforce PDF.
Browser	Conga supports the following browsers: • Microsoft Edge • Google Chrome Conga recommends the latest version of the browser for the best performance. Conga also recommends its customers to use Microsoft Edge as the browser of choice. ⚠ Internet Explorer is not supported.

Upgrade Notes

For more information on the prerequisites and post-upgrade tasks, see Upgrading Digital Commerce in *Digital Commerce on Salesforce Implementation and Deployment Guide.*

New Features

There are no new features in this release. Keep checking the Conga Documentation Portal for new updates.

Enhancements

Enhancement to the SDK to Allow Making Pricing Changes

The Digital Commerce SDK is enhanced to make pricing changes. *skipPricing* and *skipRules* flags are made available in the environment file.

Flag	Description
skipPricing	By default, this flag is set to True. Changes to an existing cart skip pricing. Setting this flag to False allows pricing when changes are done to an existing cart.
skipRules	By default, this flag is set to False. Changes to the existing cart evaluate the rules. Setting this flag to True skips rules when changes are done to an existing cart.

You may use these flags to make changes to the cart with or without pricing parameters.

- skipPricing = True and skipRules = False
- skipPricing = False and skipRules = True
- skipPricing = False and skipRules = False

Get Started

For more details, refer to the *Digital Commerce on Salesforce Summer 2020 Patch 1 SDK Guide.*

Export line-item-table-row Component to Extend for Customization

The Digital Commerce SDK is enhanced to allow exporting the line-item-table-row component in the LineItemTableRowModule to extend the component to further modify the UI template.

Get Started

For more details, refer to the *Digital Commerce on Salesforce Summer 2020 Patch 1 SDK Guide.*

Data Model Changes

This release does not have any data model changes for Digital Commerce.

Resolved Issues

There are no resolved issues in this release.

Known Issues

The following table provides the cumulative list of known issues up to this release.

Conga Internal ID	Description
DC-5903	TurboPricing integration supports up to 20 line items for the price calculation.
DC-6164	Attribute-Based Value Matrix configurations are applied to expired products.

DOC ID: DCSUM200104RN
