About Release Notes

Apttus Release Notes contain the following information about this release:

- **Packages:** List the packages that are required to upgrade to this release.
- **System Requirements and Supported Platforms:** Provides information pertaining to the requirements and recommendations you must consider before you proceed with the installation.
- **Feature Summary:** High-level description of new features and enhancements to existing features with links to Get Started topics to help you set up and use the new feature or enhancement.
- **Resolved Issues:** List the resolved issues at the time of release.
- **Known Issues:** Existing issues at the time of release.

 This documentation may contain descriptions of software features that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document. Please contact your CSM or AE for information on your specific features and licensing.

Packages

The following package and dependent package are required to upgrade to this release to utilize all the new features of this release. This is the *minimum* required version; later versions are also supported. Separate pre-requisites per feature can be found in the respective guides. The package marked **(New)** is the new package in this release.

Product	Latest Certified Version
Apttus Contract Management (New)	9.393.1

System Requirements and Supported Platforms

Apttus Contract Management is a web-based, on-demand application that is accessed via a standard web browser through the Internet. Before you install and start using Apttus Contract Management, you must ensure the minimum system requirements.

System Requirements	
Item	Requirement
Operating System	Standard Salesforce.com requirements. See Salesforce PDF .
Browser	<p>Apttus supports the following browsers:</p> <ul style="list-style-type: none"> • Google Chrome™ • Mozilla Firefox™ • Microsoft Edge™ • Apple Safari™ <p>Note: Internet Explorer is not supported.</p>
Microsoft Office	<ul style="list-style-type: none"> • Microsoft Word 2003 with Service Pack 3 • Microsoft Word 2007 with Service Pack 2 plus hotfix package 976477 (Word 2007 version number must be greater than 12.0.6520.4999) • Microsoft Word 2010 (32 bit & 64 bit) or Office 2010 (32 bit & 64 bit) • Microsoft Word 2013 (32 bit & 64 bit) or Office 2013 (32 bit & 64 bit)

Feature Summary

The following features are new in this release:

- [Wizard Agreement Question Field Limit Enhancement](#)
- [Wizard Rule Object Field Value Enhancement](#)

Wizard Agreement Question Field Limit Enhancement

Wizard Agreement Question field limit enhancements enable a user to enter a long question in the **Question/Instruction** field of the **Wizard Input Control** object. The character limit for the long question is 10,000 characters and visible lines are five.

Get Started

For more information on the **Wizard** input control, please refer to the [Creating Inputs from the Wizard Designer](#) section in the Contract Management Winter 2017 Administrator Guide.

Wizard Rule Object Field Value Enhancement

Wizard Rule Object field value enhancements enable a user to enter a long value while configuring the input rule in the Wizard Configurator. The value field limit was 255 characters, now it is extended to 10,000 characters.

Get Started

For more information on the configuring the input rule, please refer to the [Configuring Step Input Rules from the Wizard Designer](#) section in the Contract Management Winter 2017 Administrator Guide.

Resolved Issues

The following table represents the resolved issues in this release:

Case Number	Description	Apttus Internal ID
00217132	In an Agreement Wizard , when a user has any input field and the same input field is used as the next screen in the input rule, the input rule was not evaluated as expected. This issue has been resolved.	CLM-2802
00216628	In an Agreement Wizard , the sidebar was hidden when a user changed the value of Input field and dependent input field, values got changed. This issue has been resolved.	CLM-2784
N/A	On Salesforce Lightning User Interface, when a user was clicking New under Agreement tab, fields were appearing in one column. This issue has been resolved.	CLM-2807
N/A	When a user was using template versioning, the template was checking in but the template version was not getting activated, if the file size was more than 10 MB in size. This issue has been resolved.	CLM - 2824
	<p>Note</p> <p>13MB is a technical limit on Salesforce. If you want to use more than 13 MB files, you must switch off template versioning.</p>	
N/A	When a user was sending an agreement for Review or Signatures , the email validation was failing, when the domain name was more than four characters. This issue has been resolved.	CLM - 2859

Known Issues

The following table represents known issues:

Apttus Internal ID	Description
CLM-2730	In Salesforce One app, when a user clicks on the Agreement Actions from the Action panel once, the user stays on the same page. To go to the next page, the user must click twice. This is a Salesforce limitation for embedded Visualforce pages.
CLM-2695	When creating a new agreement in Salesforce Lightning Experience mode, after selecting the record type and account type when the user clicks Next , the user is directly taken to the view only mode of Agreement Record page instead of the Edit Agreement page.
CLM-2690	In Salesforce One app, clicking the lookup option doesn't open a new pop-up window.
CLM-2689	In Salesforce Lightning mode, when creating a new agreement from the Accounts page, the Account field of the agreement record remains blank, instead of showing the name of the Account from which the agreement is being created.
CLM-2440	After an agreement document is sent for review, the activity history does not record details for any of the attachments.
CLM-2416	Entries on the Master Agreement Clauses listing are showing an incorrect timestamp
CLM-2319	When a user uses the type-ahead search feature in the Wizard Component Library, the resultant text is sometimes deleted as it is being typed.
