Apttus Contract-Configuration Integration (New)	7.0.0068 7.68
Apttus Quote/Proposal-Contract Integration (New)	7.0.0031 7.31

Feature Summary

This release introduces the following updates.

- [Unique identification of different addresses for different accounts on the Invoice object](#)
- [Improved address logic on Tax Input](#)

Unique identification of different addresses for different accounts on the Invoice object

Apttus Billing now uniquely identifies the Billing Address, Shipping Address and Sold To address for an invoice and invoice line items from the different accounts associated with the asset.

Get Started

For details on how the addresses are populated on the invoice and the invoice line items, refer to [Invoice Detail](#).

Improved address logic on Tax Input

Tax Address in the Tax Input container now uses the Shipping Address of the Ship To account. If the user has not mentioned any Shipping Address for the Ship To account, then the Billing Address of the Ship To account is used.

Get Started

For details on Tax Input, refer to [Custom Settings for Tax](#).

Resolved Issues

The following table represents resolved issues in the current release.

Case Number	Description	Apttus Internal ID
Billing v4.101.1		
211582	<p>When you canceled a non-active credit memo, the credit amount was not reflected back in the available credit amount of the invoice.</p> <p>This issue is now resolved. On cancellation, the credit amount of a non-active credit memo is now added back to the available credit amount of the invoice.</p>	BIL-1274
211670	<p>In some cases the system was not able to link the usage inputs with the related usage schedules.</p> <p>This issue is now resolved. Usage schedules are now linked correctly with the usage inputs. Usage Inputs are now rated correctly according to the usage schedules.</p>	BIL-1299
	<p>Cancellation of billing schedules with Status as <i>Pending Milestone</i> was not functional.</p> <p>This issue is now resolved. You can now cancel billing schedules with Status as <i>Pending Milestone</i>.</p>	BIL-1315
	<p>Tax calculation gave <i>List Index out of Bound</i> error when you tried to approve multiple invoices with the Approve Button.</p> <p>This issue is now resolved. Tax calculation works fine while approving multiple invoices.</p>	BIL-1322

Known Issues

There are no known issues in this release.
