New Features and Enhancements

- Conga Grid now uses Salesforce API version 48. This API version supports all of the latest Salesforce objects. Users can now use Grid with all objects supported in Salesforce API version 48.
- Time fields are now supported and available to use in Conga Grid.
- Rich Text field editing, including text formatting such as bullets, italics, and bold font, is now available in Detail Grids.

Issues Resolved

- Users can successfully use the Redlines tab in the Reading Pane of the Contract Grid created from Conga Contracts Quick Start. An error previously occurred when loading the Redlines Reading Pane tab because the Visualforce page was not successfully created from Conga Contracts Quickstart.
- Users can successfully create new Grids for the Profile object with the Create a Conga Grid View option in Conga Grid Quickstart. Upon clicking Install after selecting Profile as the object to create the Grid, the wizard user interface previously did not proceed and create a Grid.
- Grids with multiple lookup fields that are exported with Record IDs no longer have misaligned columns in the exported Excel file. Previously, columns were misaligned in the downloaded Excel file when Grid users leveraged the Export To action and the subsequent Excel with Record IDs option.
- The Enable Edit setting is respected in a Grid when a it is set to false in the corresponding Visualforce page. Previously, users could still edit Grid data when Enable Edit was set to false in the corresponding Visualforce page.
- The checkbox indicator remains in the object checkbox when selecting a field from a related object to add to a Grid. Previously, the checkbox indicator disappeared from the related object's checkbox when selecting a field from that object to place on a Grid.
- The Keyboard Shortcut descriptions are updated to provide accurate descriptions of each shortcut. The descriptions previously did not accurately describe each shortcut's related action.
- Grids exported as CSV files no longer display extraneous div tags in long text fields.
- Grid Views with a large amount of formulas now successfully display all formulas in the Saved Formulas section. Previously, some formulas were not displayed in the Saved Formulas section when 10 or more formulas were present.
- Users can successfully modify and save Column Settings for a checkbox field in a Grid. Previously, Grid generated an error message when attempting to modify and save Column Settings for a checkbox field.
- The Rich Text Editor's height in Grids is higher to allow users to see more text. Text in the Rich Text Editor was getting cut off by the previous height.

This document may describe certain features and functionality of software that Conga makes available for use under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not, in any form, or by any means, use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part of the software. Reverse engineering, disassembly, decompilation of, or the creation of derivative work(s) from, the software is strictly prohibited. Additionally, this document may contain descriptions of software modules that are optional and for which you may not have purchased a license. As a result, your specific software solution and/or implementation may differ from those described in this document.

U.S. GOVERNMENT END USERS: Conga software, including any operating system(s), integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Neither the software nor the documentation were developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Conga and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Apttus, AI Analyze, Conga, Conga AI, Conga AI Discover, Conga Batch, Conga Collaborate, Conga Composer, Conga Conductor, Conga Connect, Conga Courier, Conga Grid, Conga Mail Merge, Conga Merge, Conga Orchestrate, Conga Sign, Conga Trigger, Digital Document Transformation, True-Up, and X-Author are registered trademarks of Conga and/or its affiliates.

The documentation and/or software may provide links to web sites and access to content, products, and services from third parties. Conga is not responsible for the availability of, or any content provided by third parties. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Conga is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Conga is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.
